Corrosion Resistant Customised Mixed Type Agitators

Business Background:

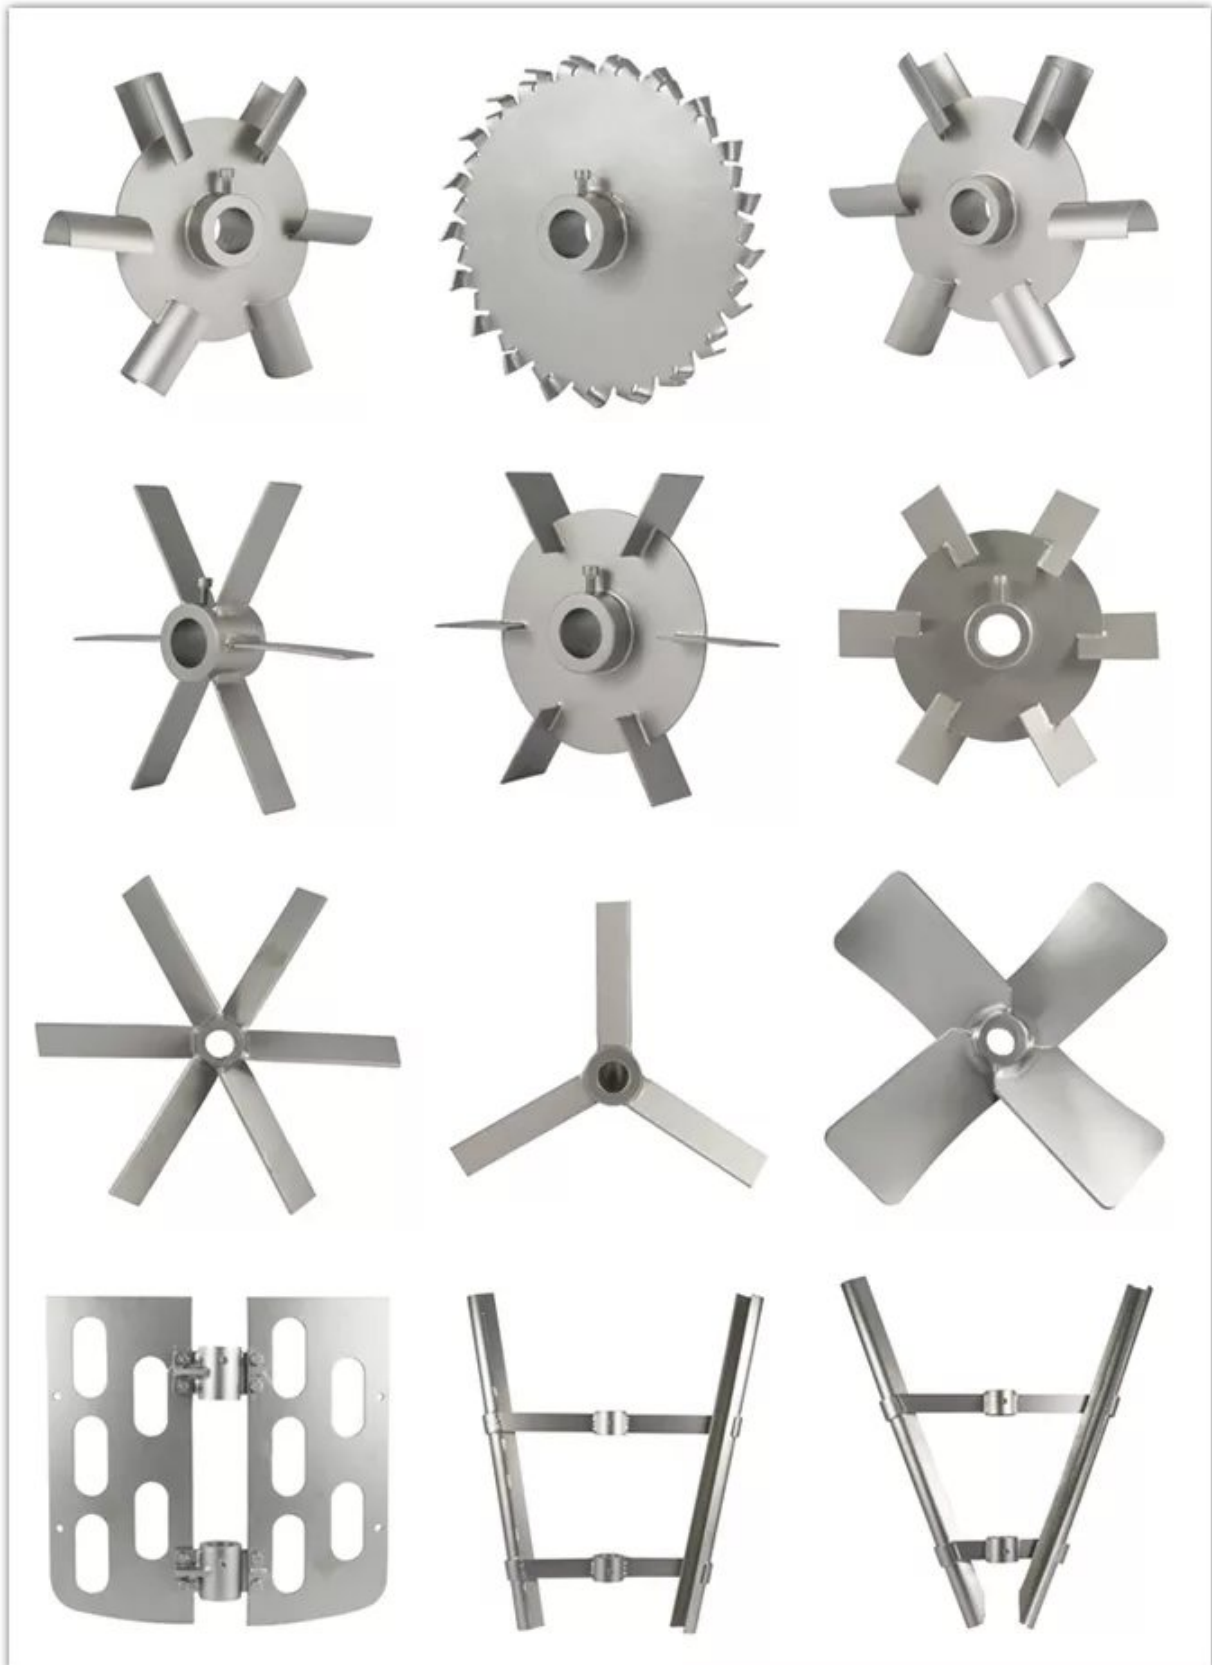

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Dosing Tank Chemical Agitator Industrial Agitating Mixers

Business Background:

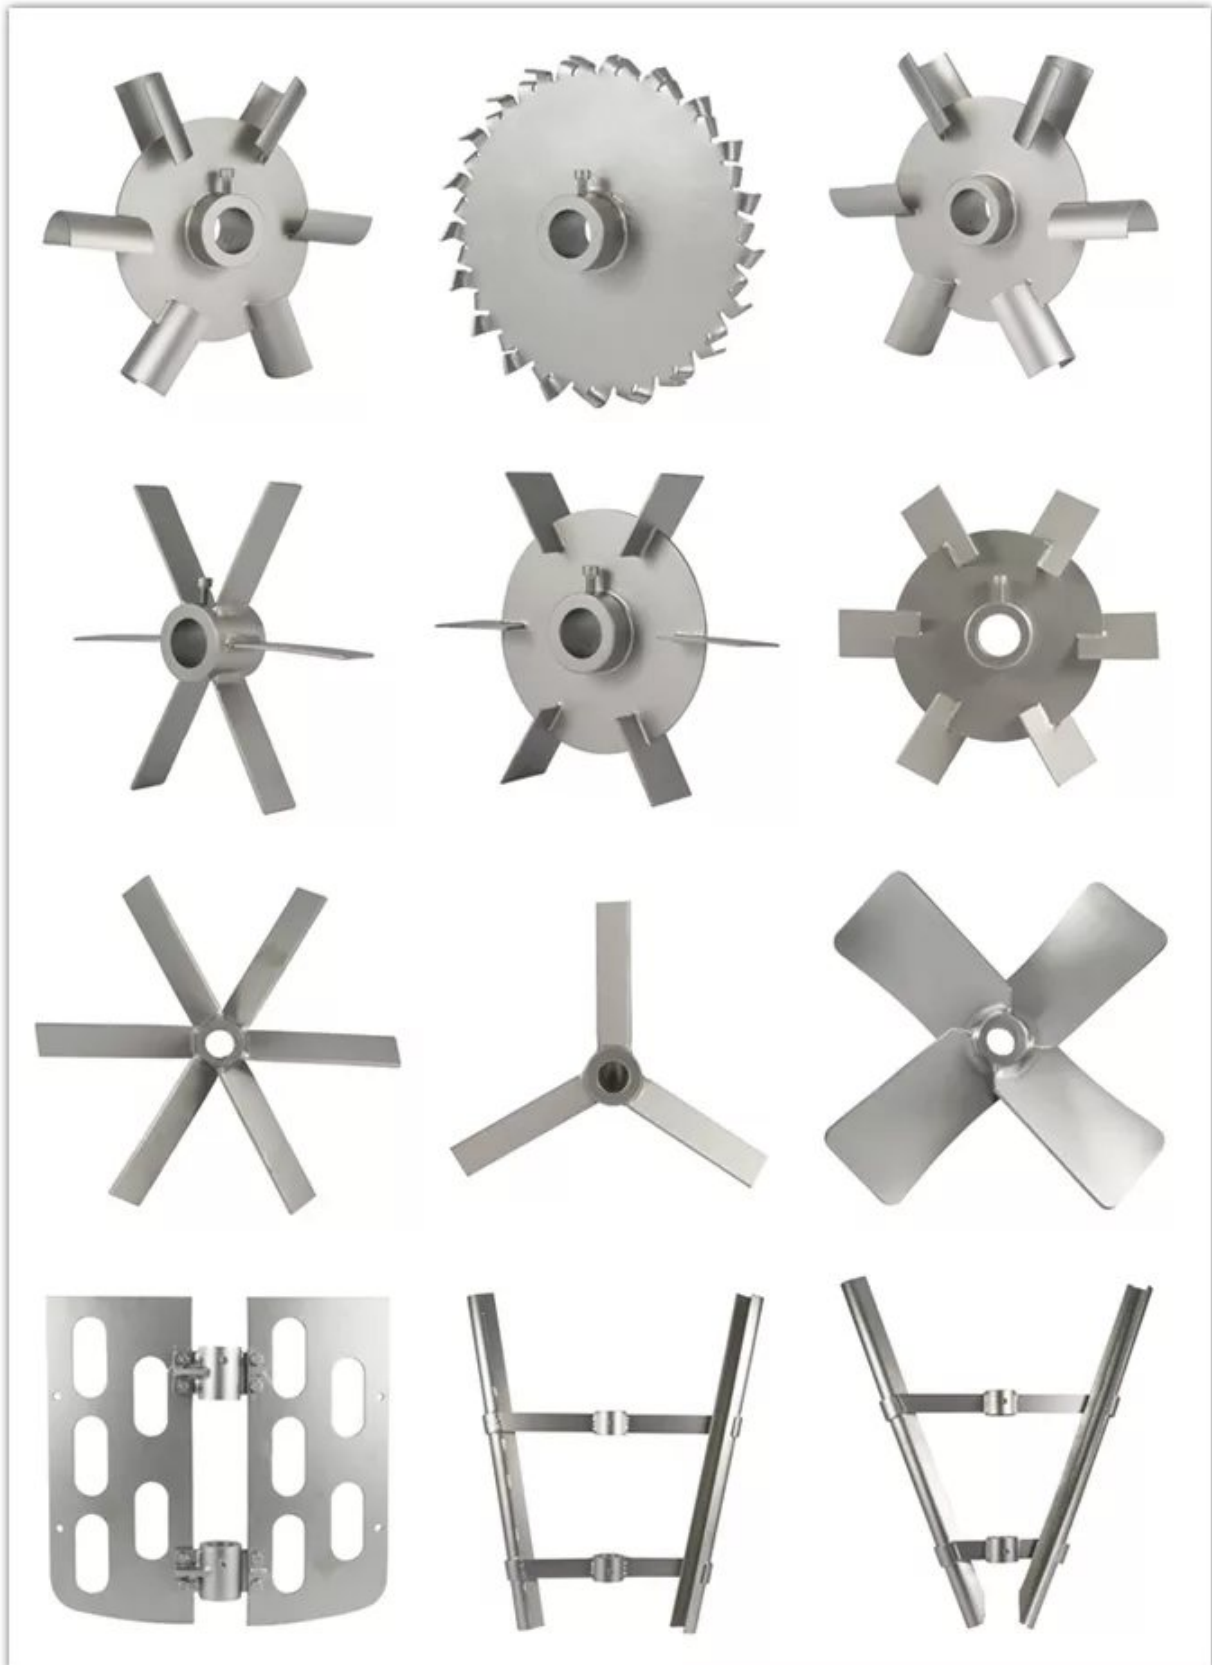

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Top Entry Agitator Agrochemicals Customized Agitators

Business Background:

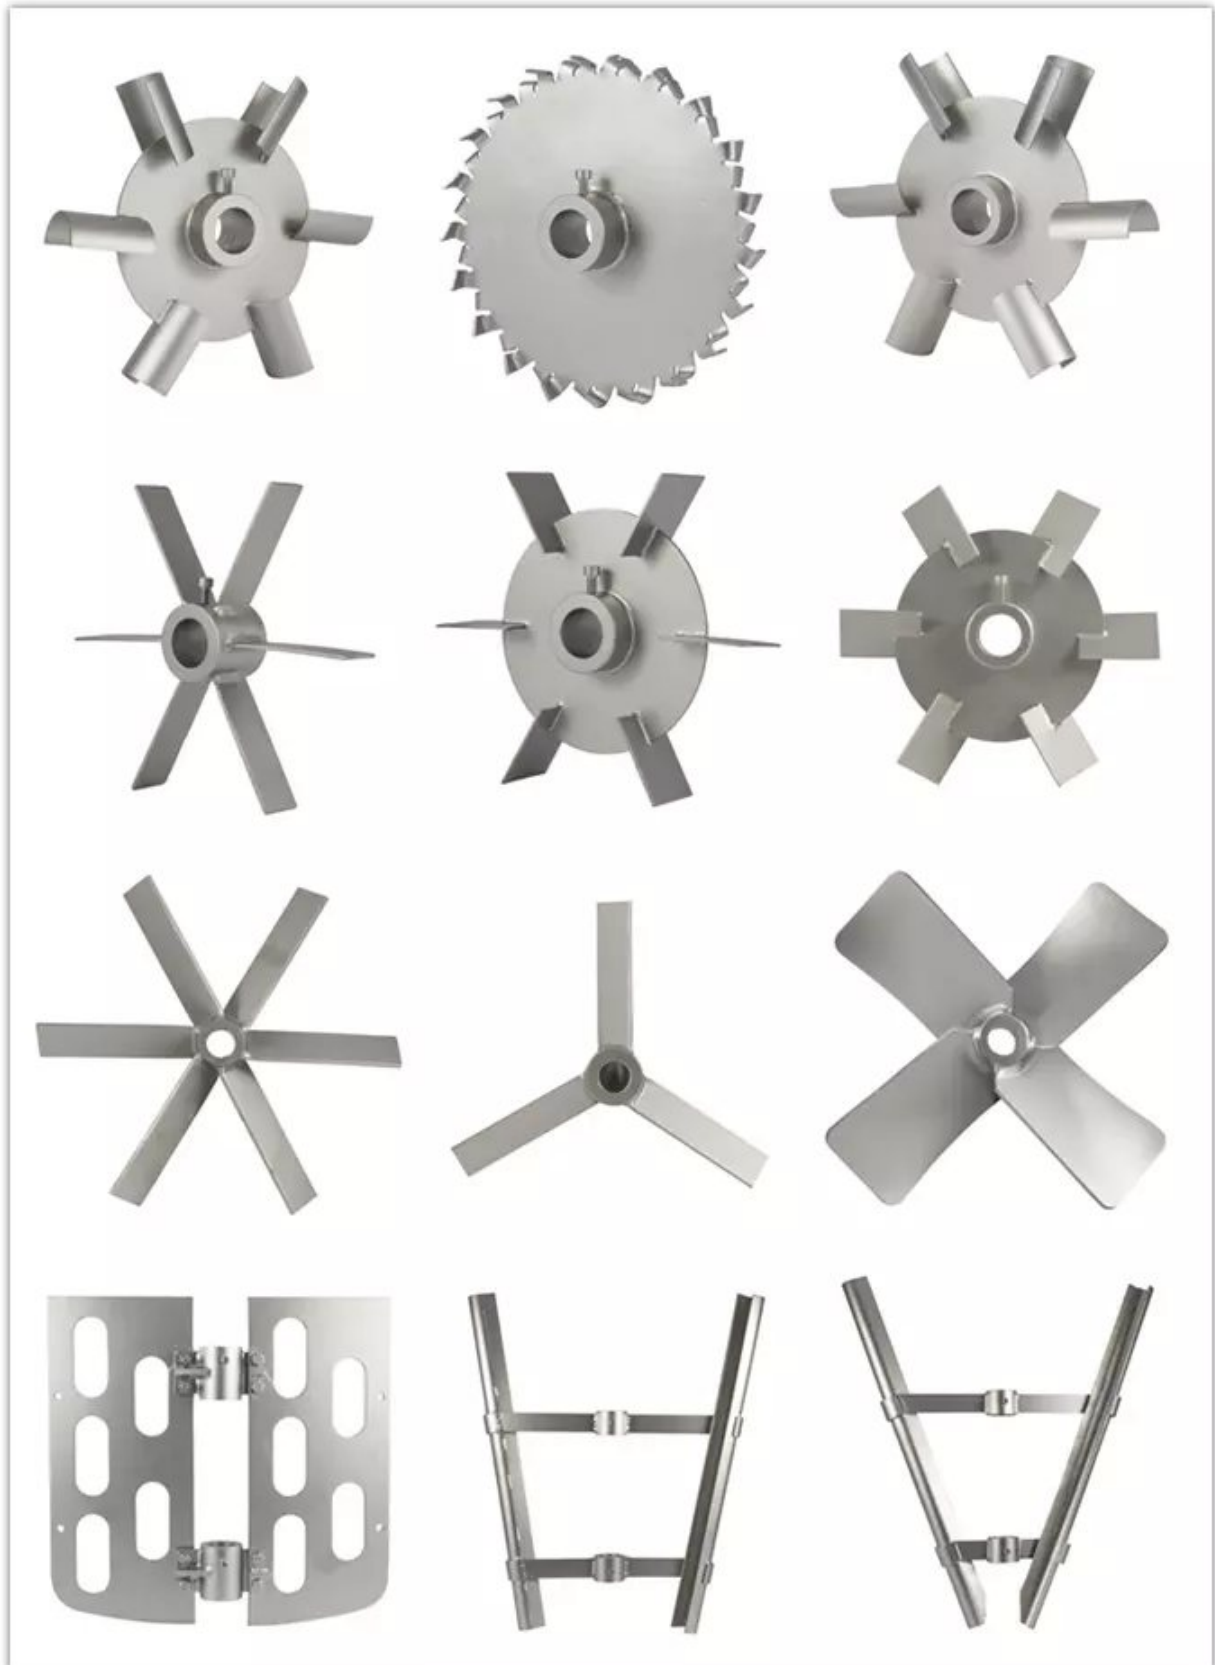

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Top Entry Agitator Agrochemicals Stainless Steel Agitators

Business Background:

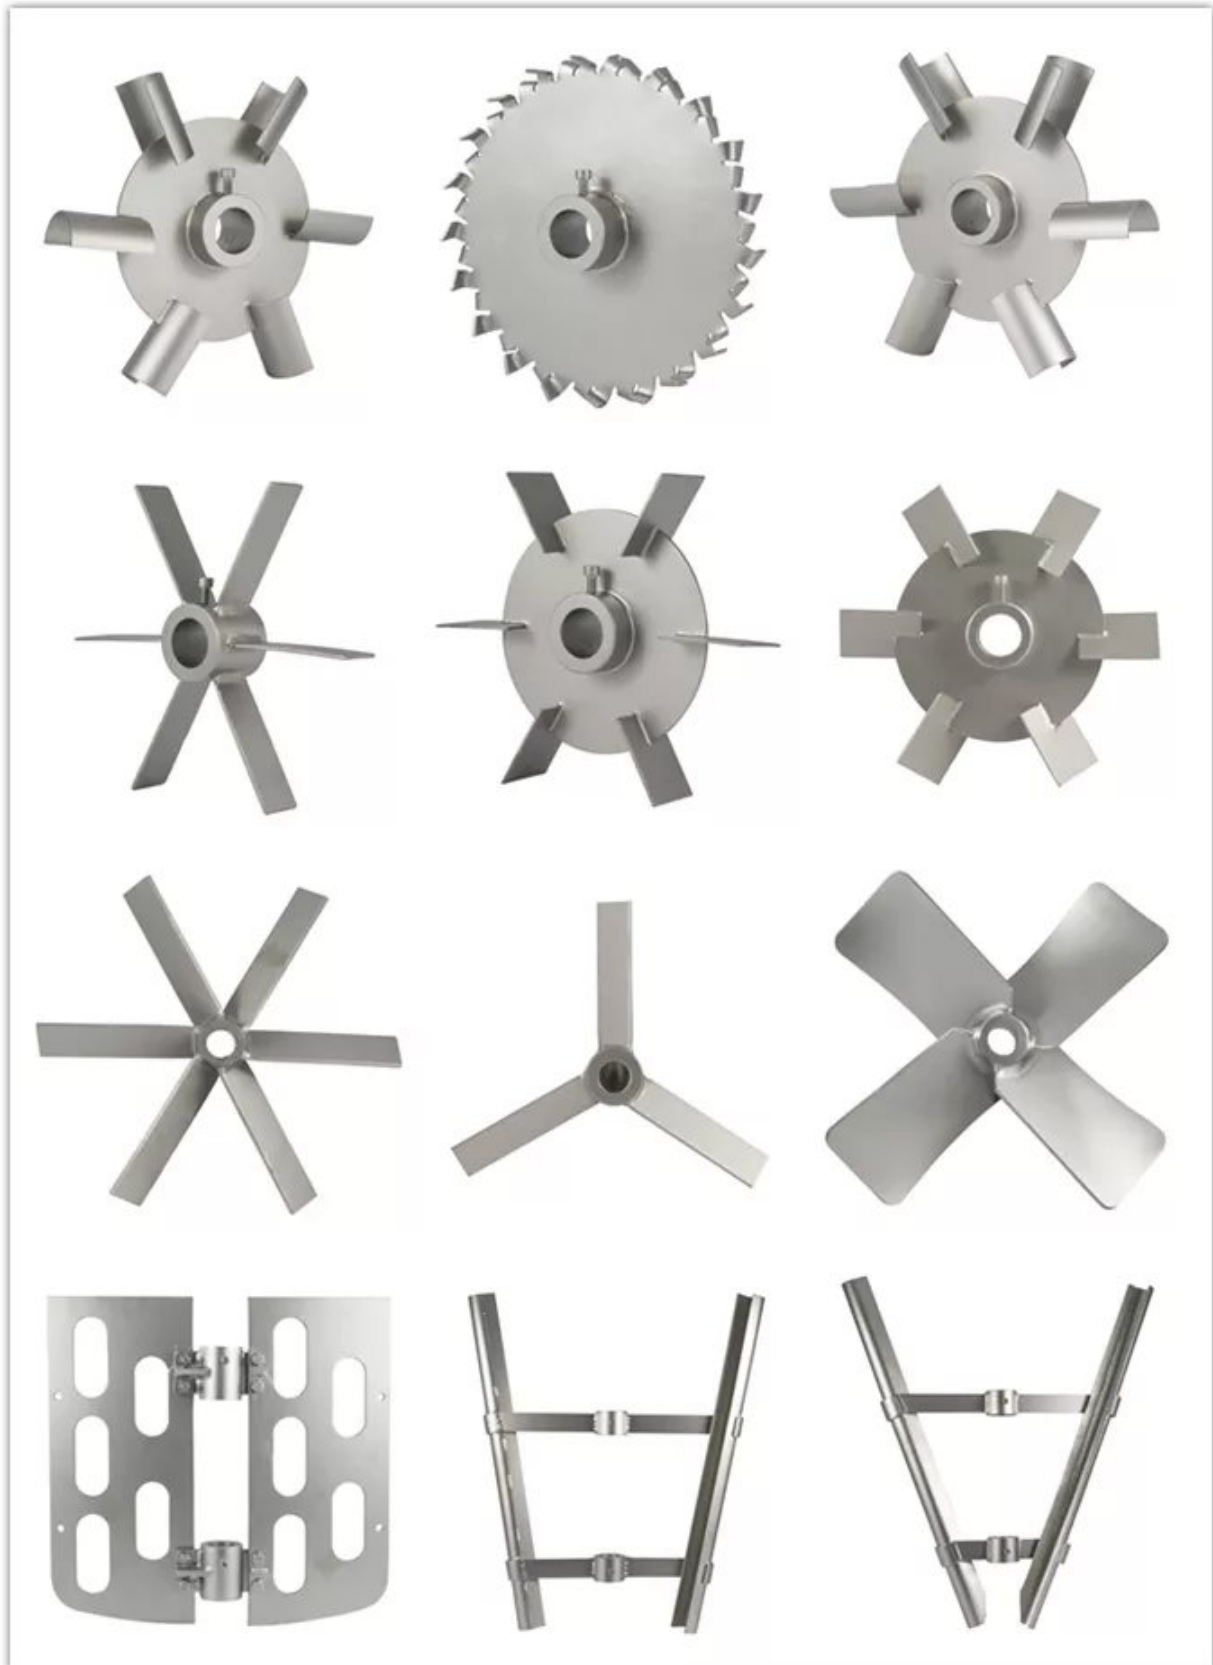

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

SS316 Oilfield Blending Agitators

Business Background:

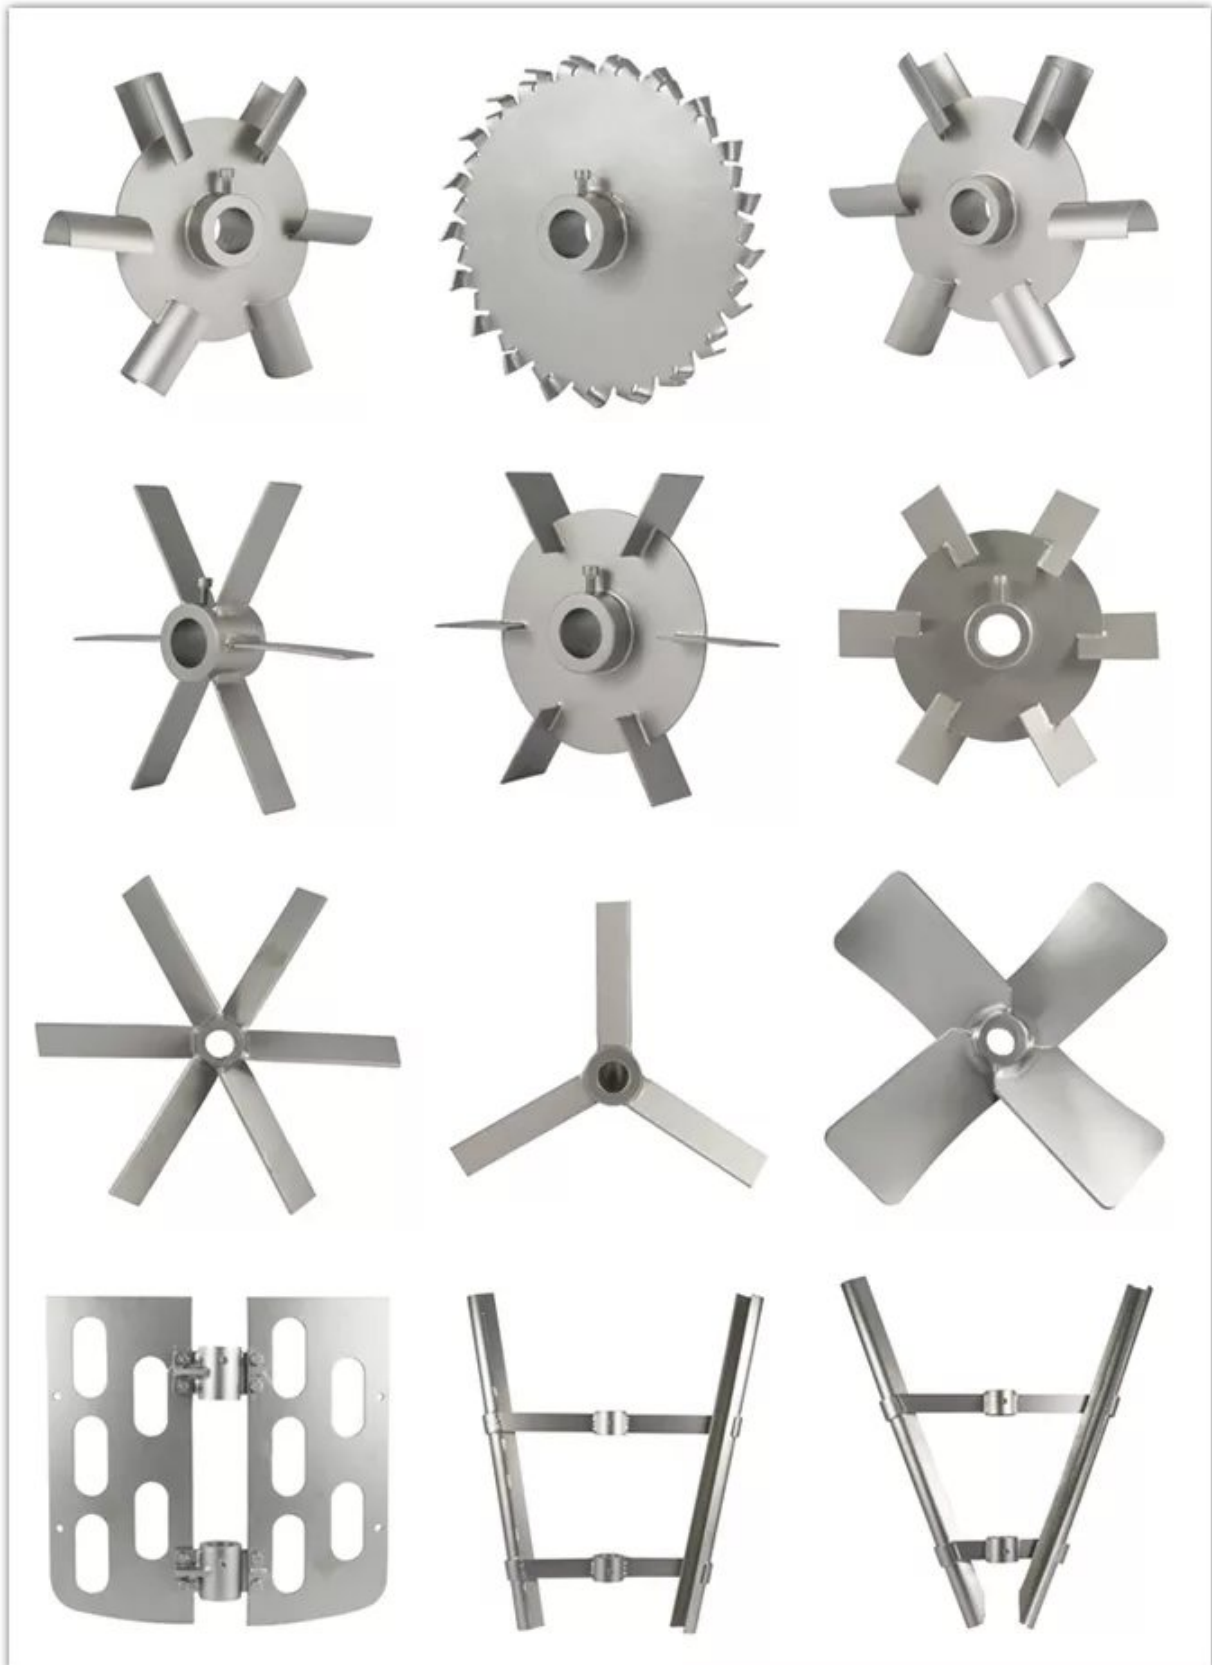

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

SS316 Wear-resistant Mixing Agitators

Business Background:

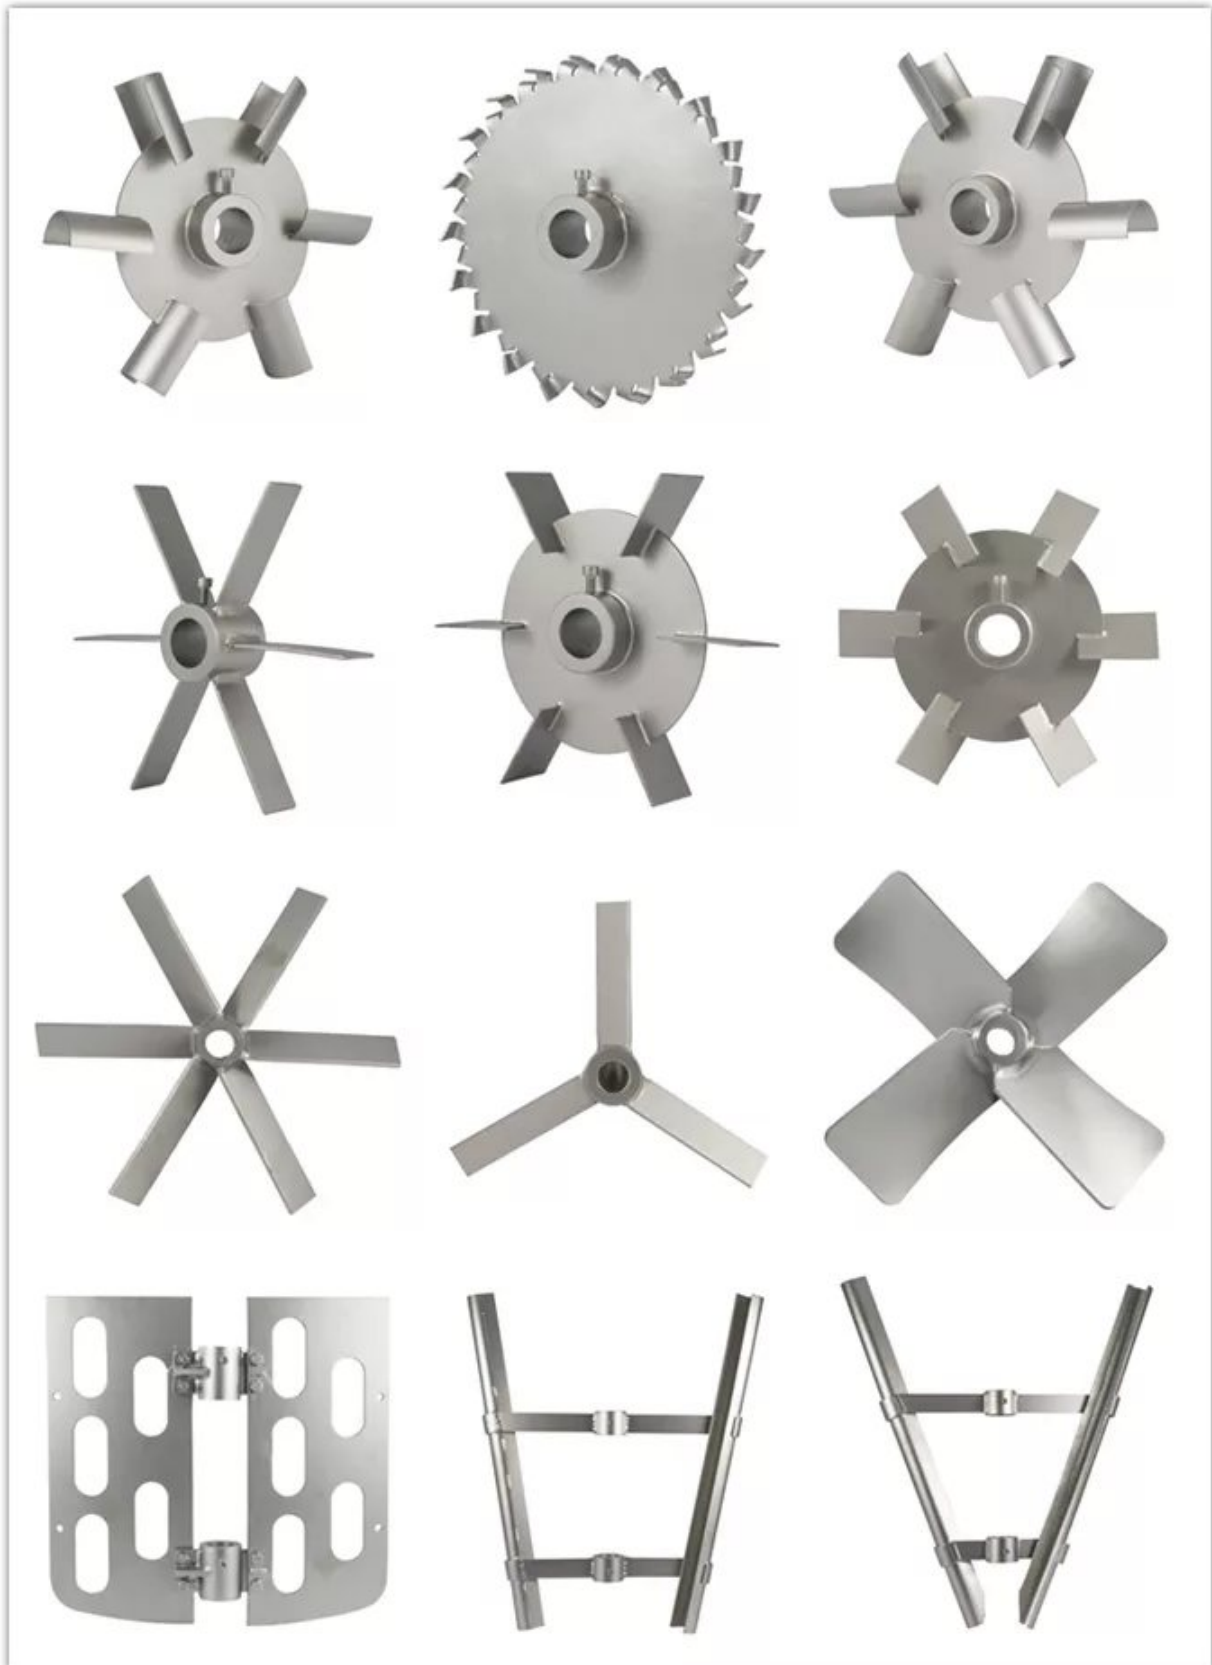

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Stainless Steel Mud Mixing Agitators

Business Background:

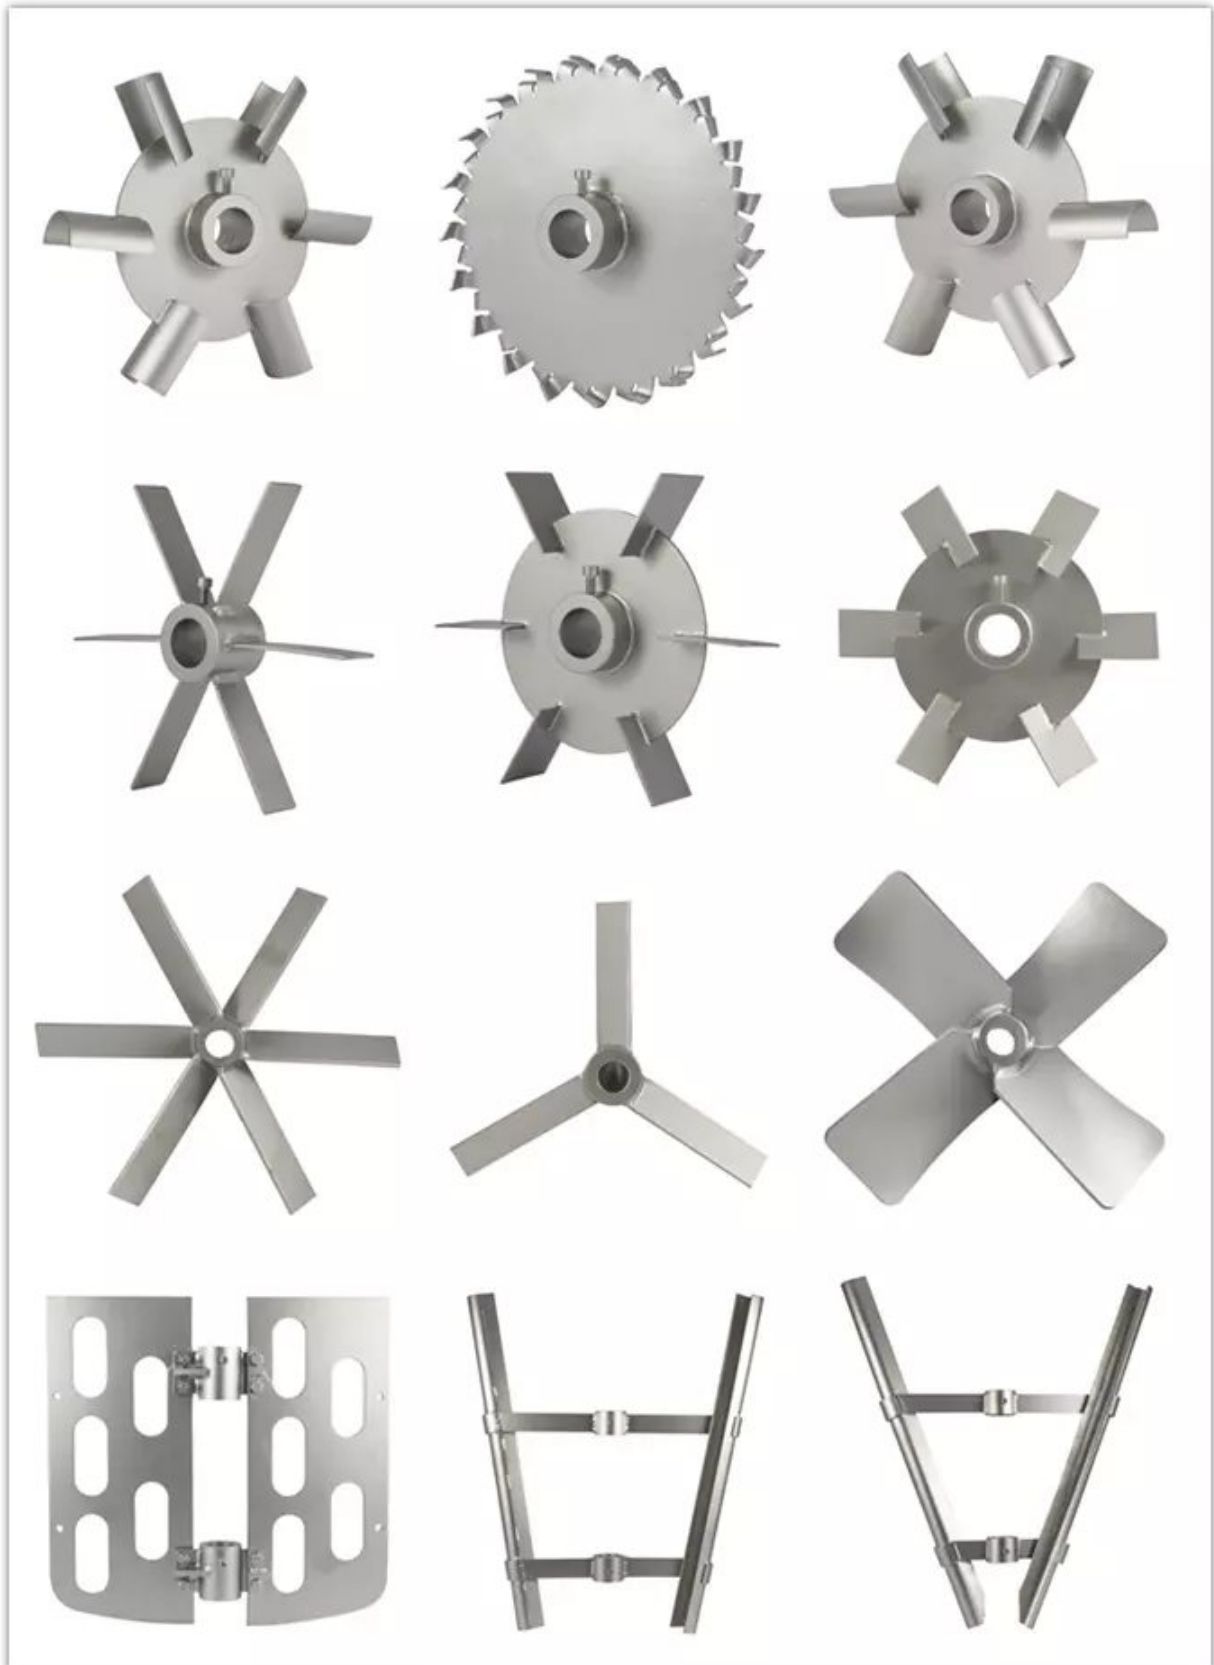

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Food Industry Mixed Type Agitators

Business Background:

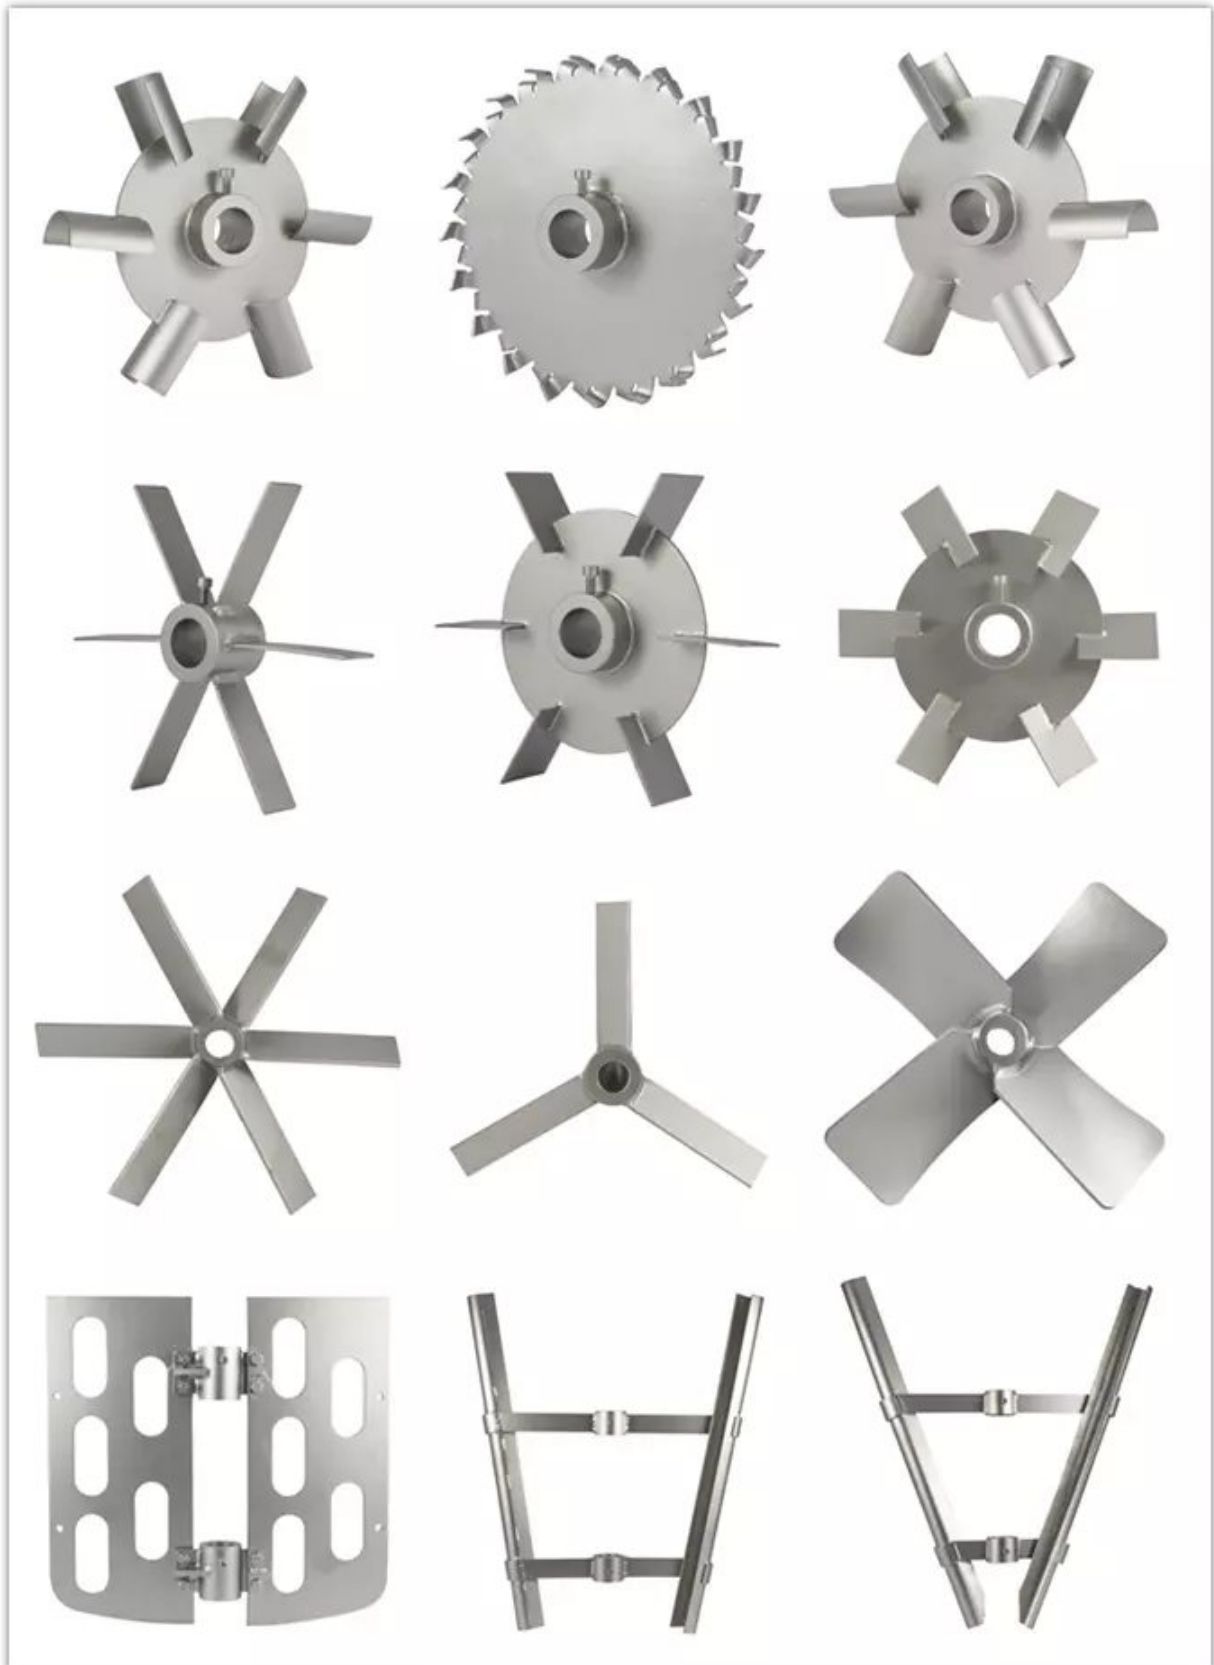

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Mixed Type Agitators

Business Background:

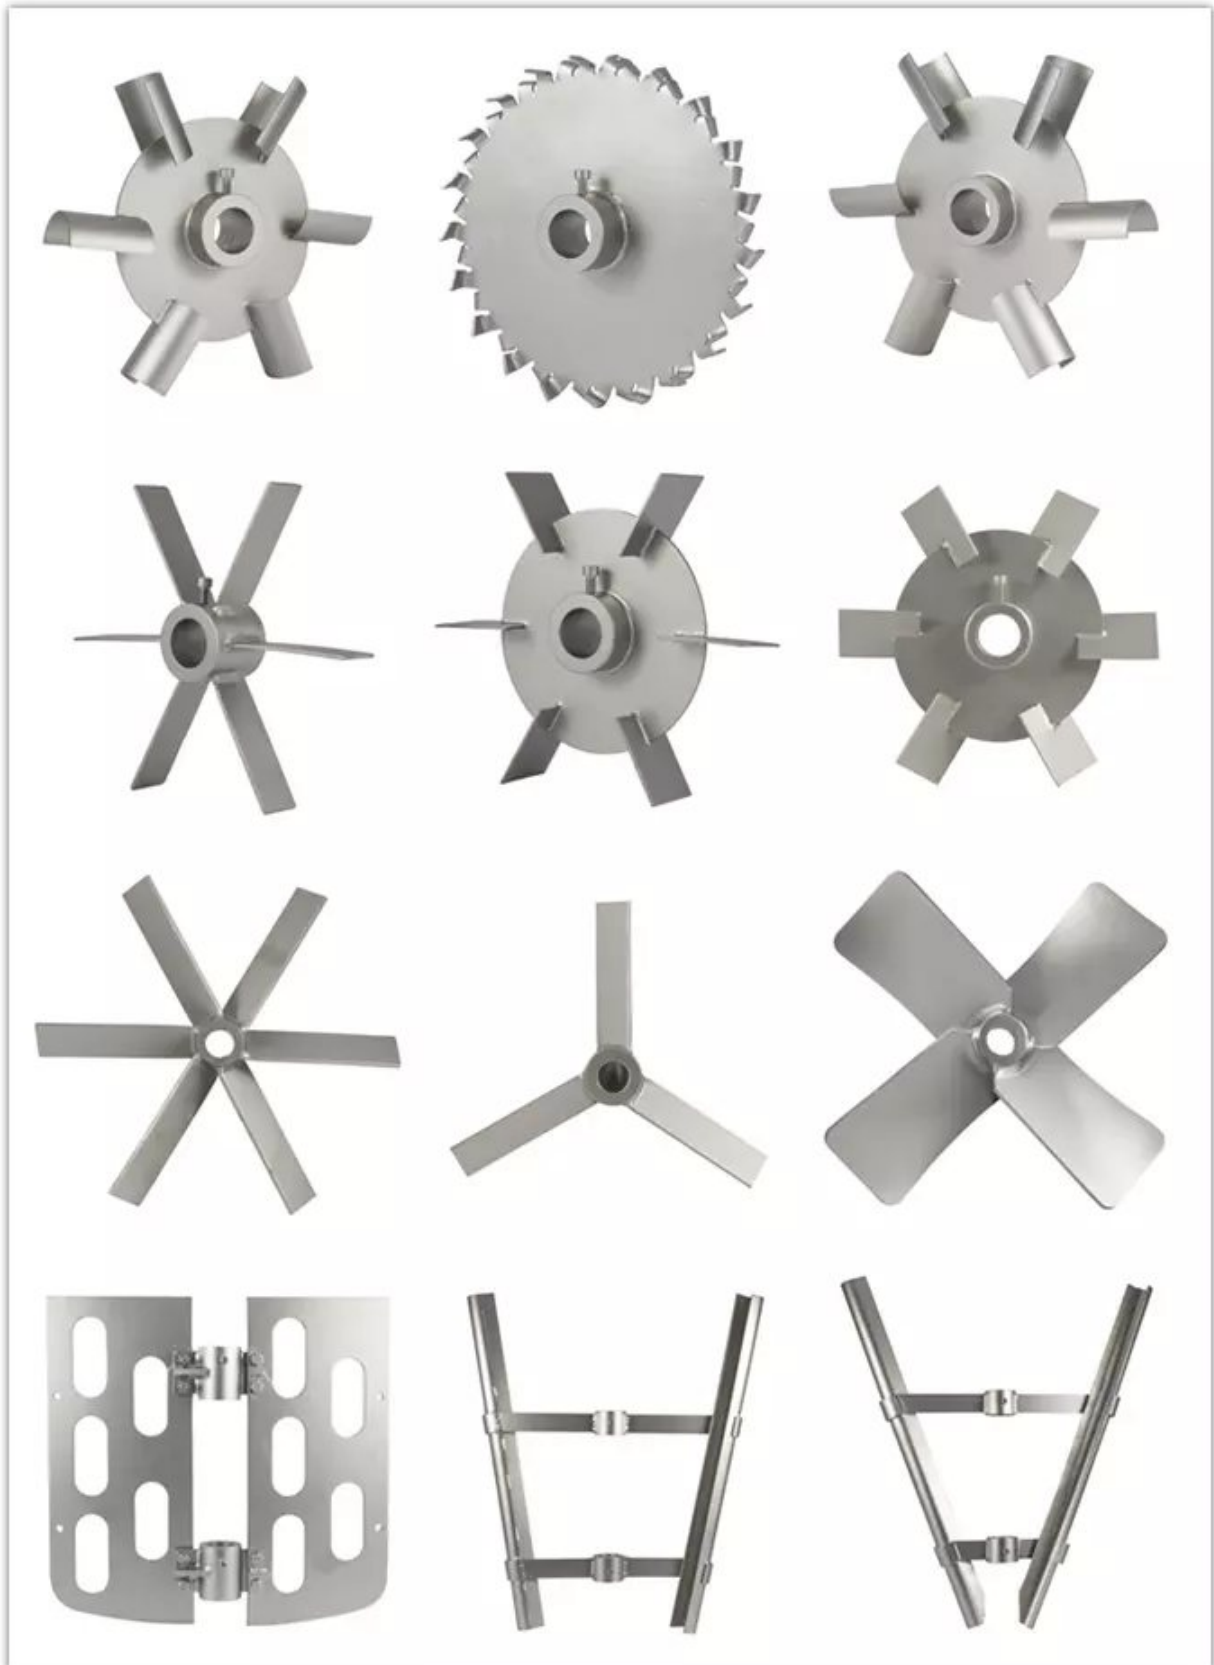

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Viscous Fluid Mixing Agitators

Business Background:

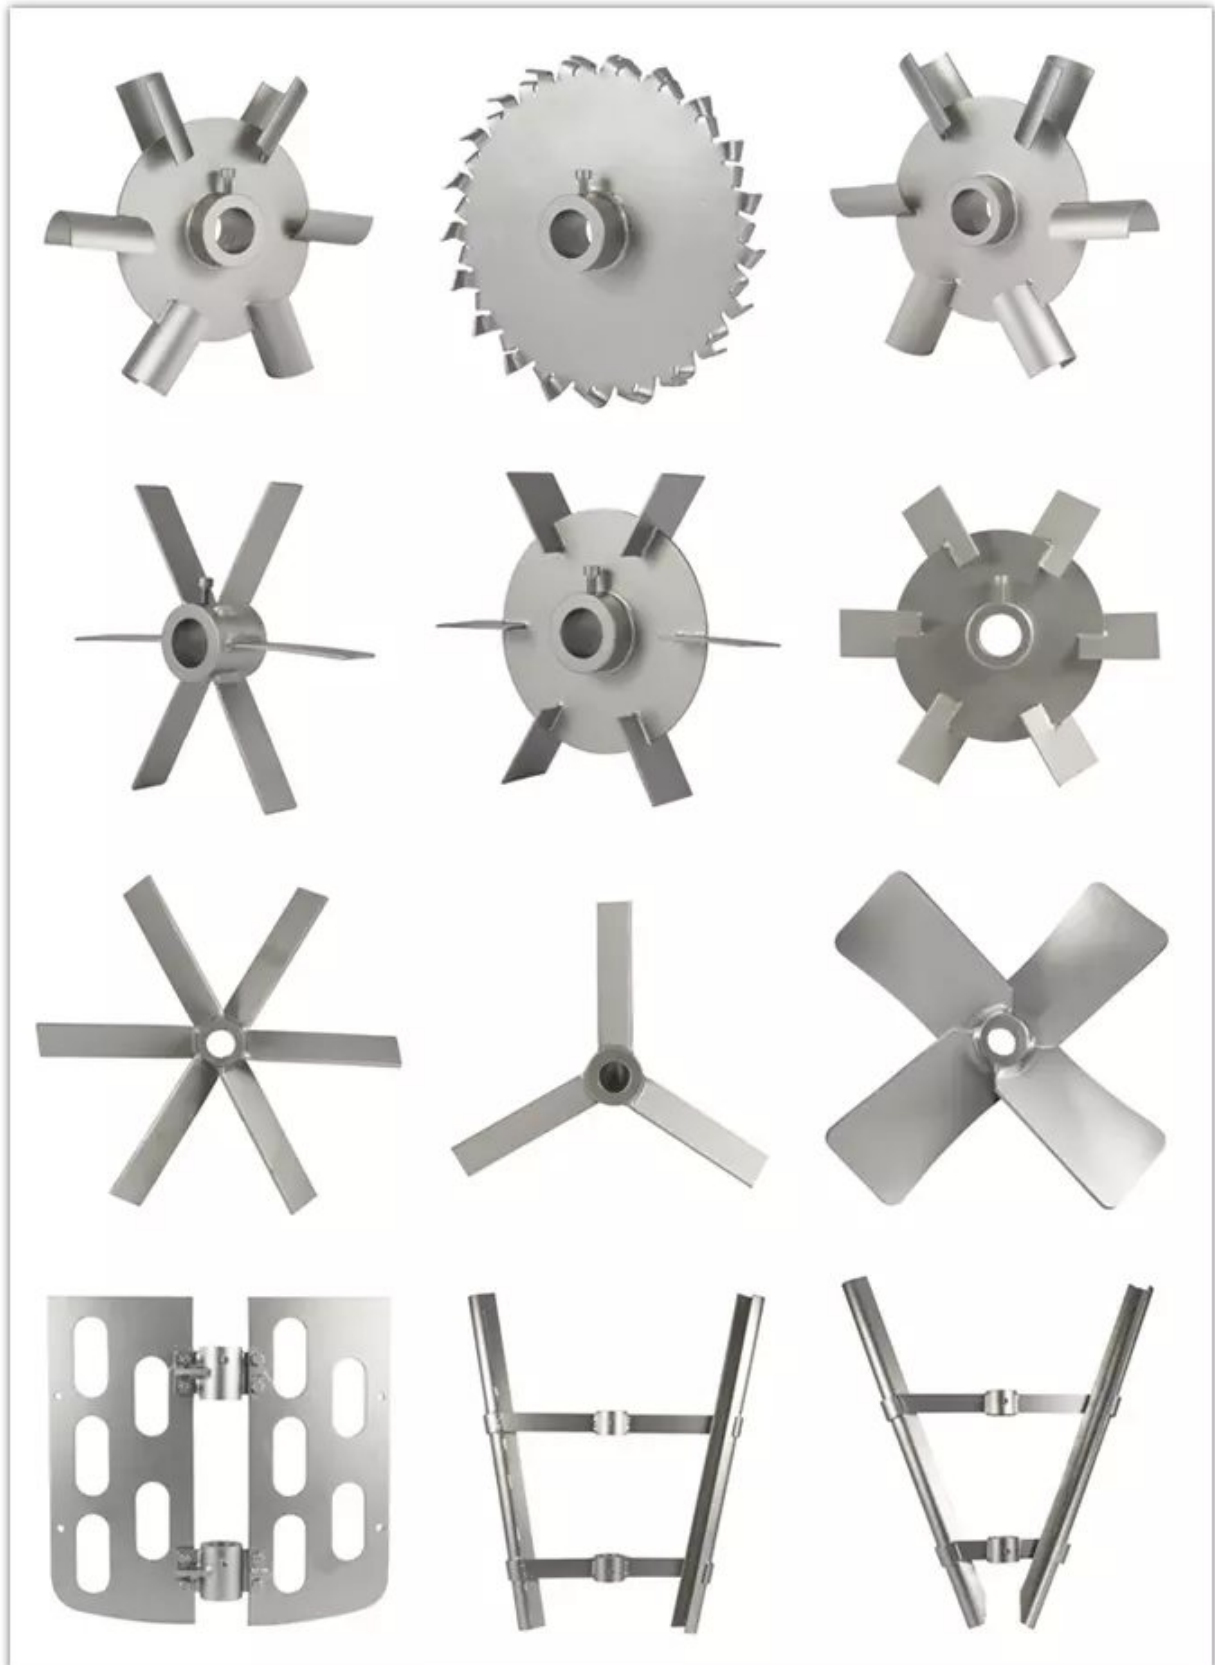

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Stainless Steel Magnetic Force Mixing Agitators

Business Background:

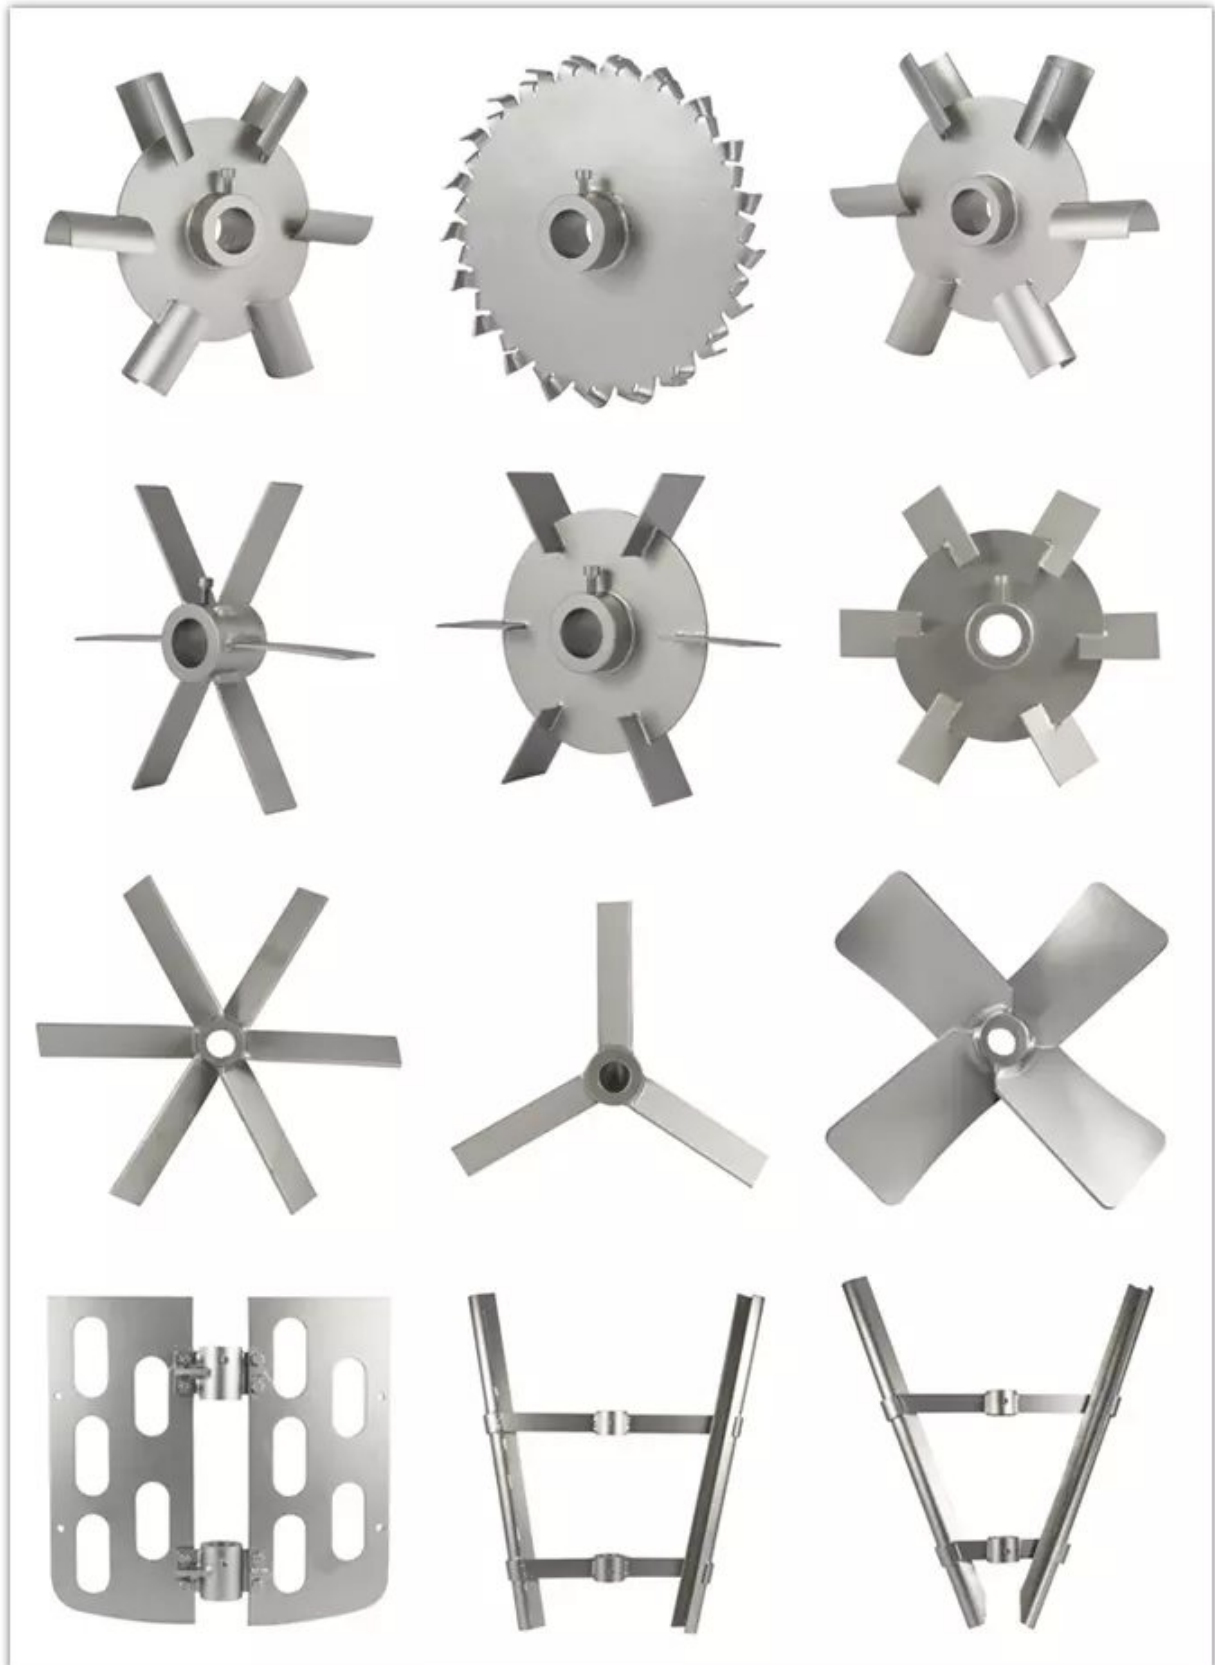

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Hybrid Powder Mixing Agitators

Business Background:

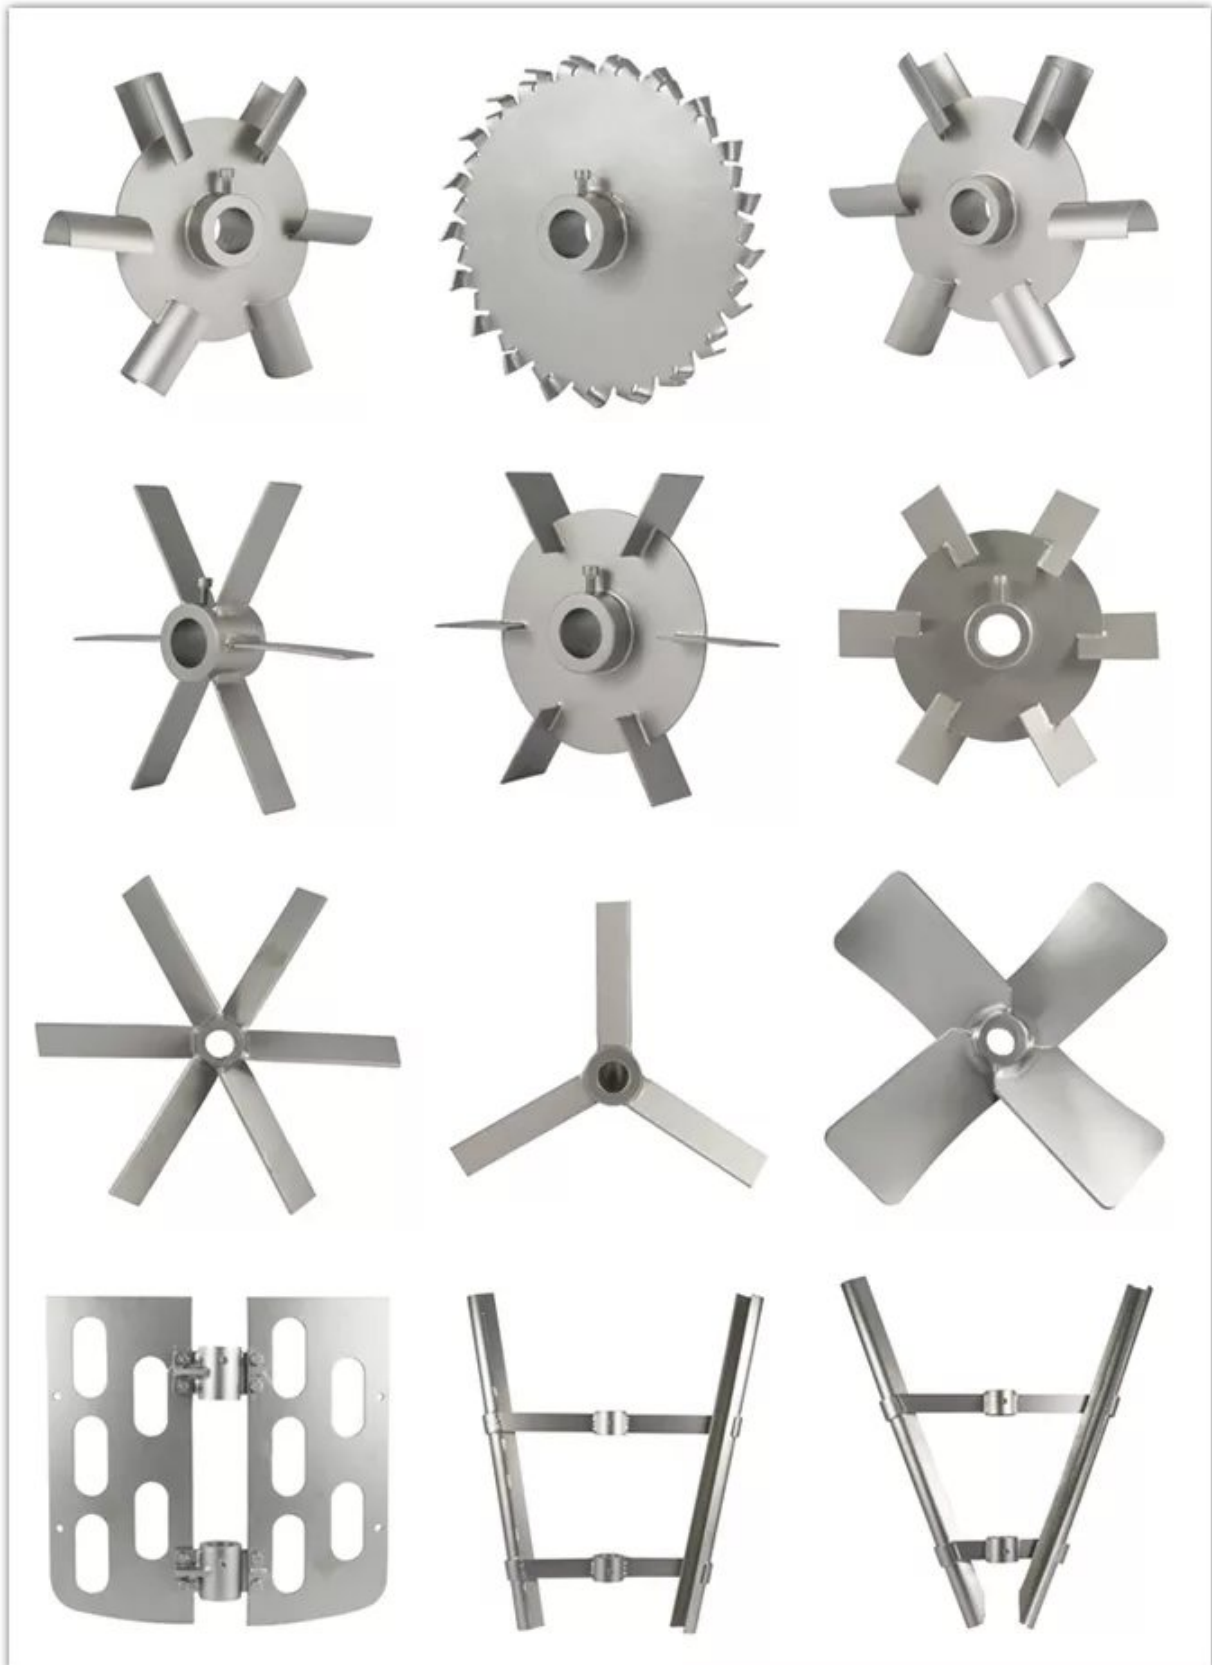

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Liquid With Suspended Solids Stainless Steel Heavy Agitators

Business Background:

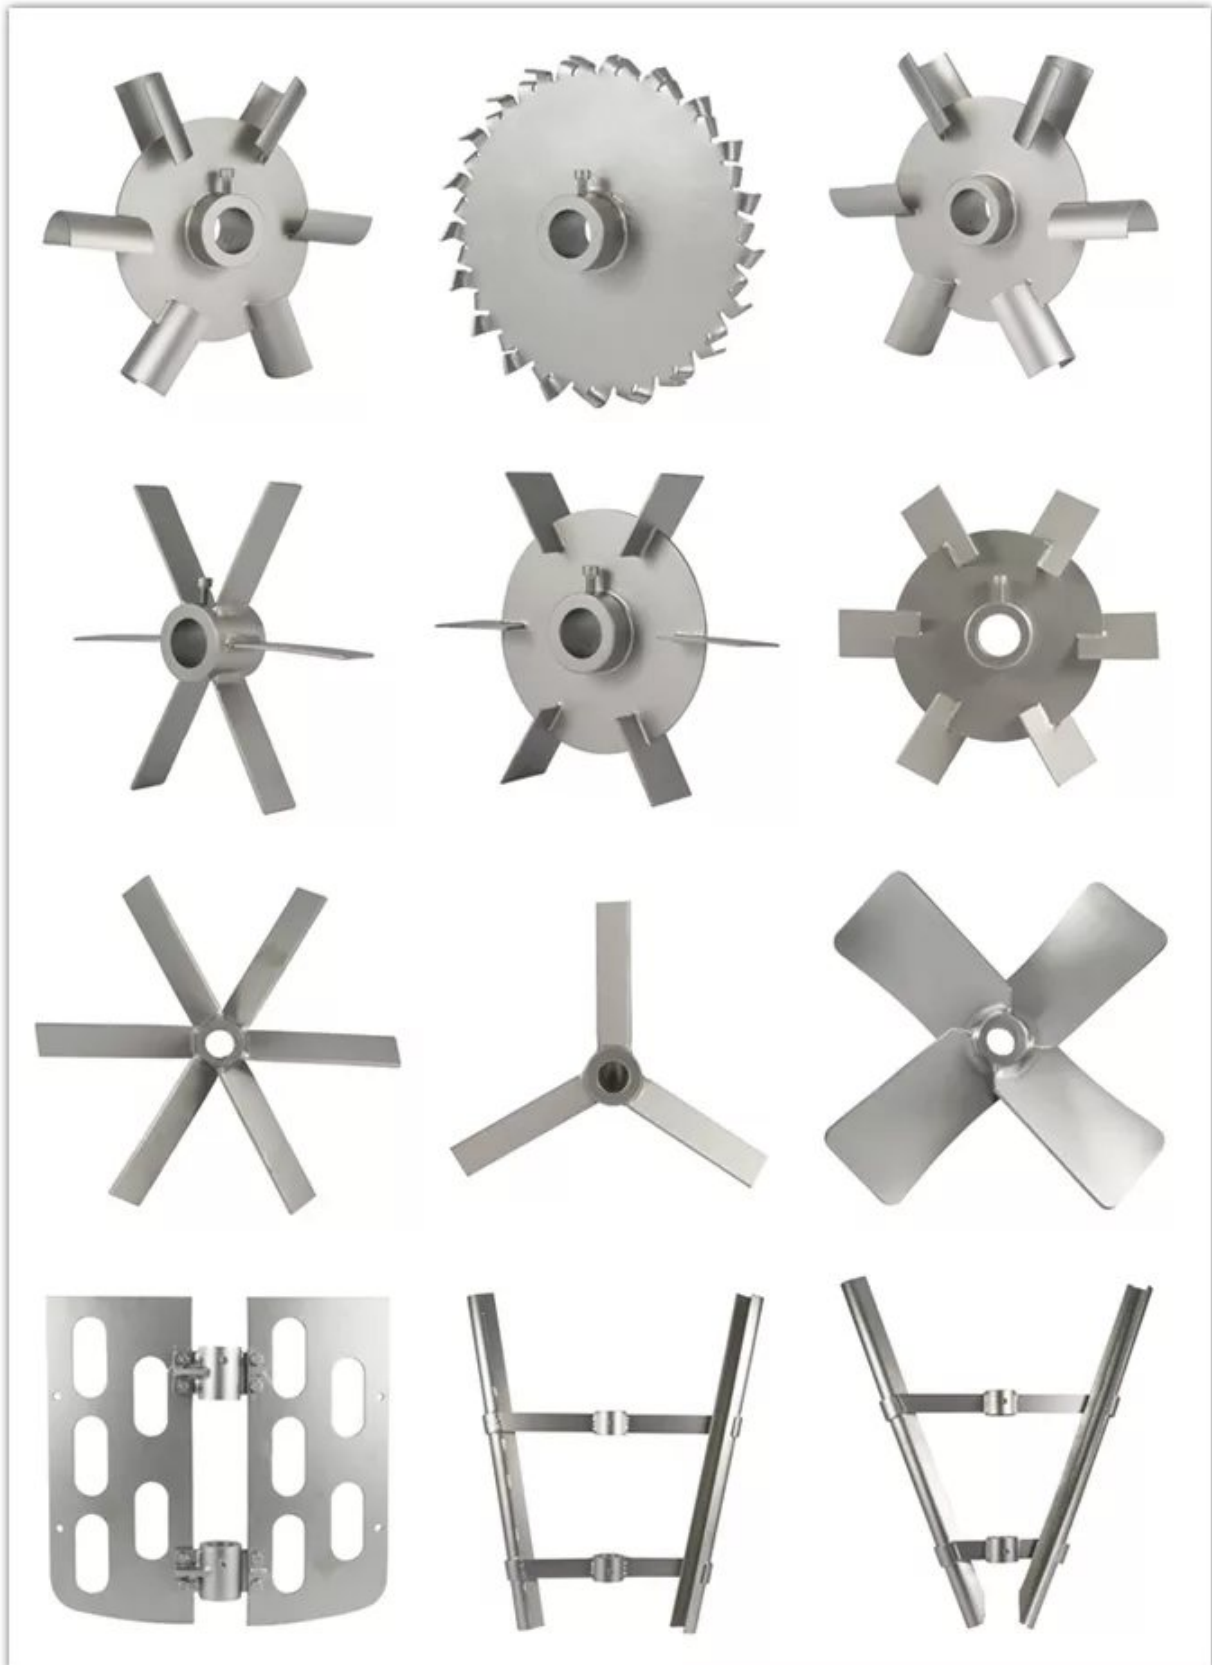

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Stainless Steel Stainless Steel Pharmaceutical Agitators

Business Background:

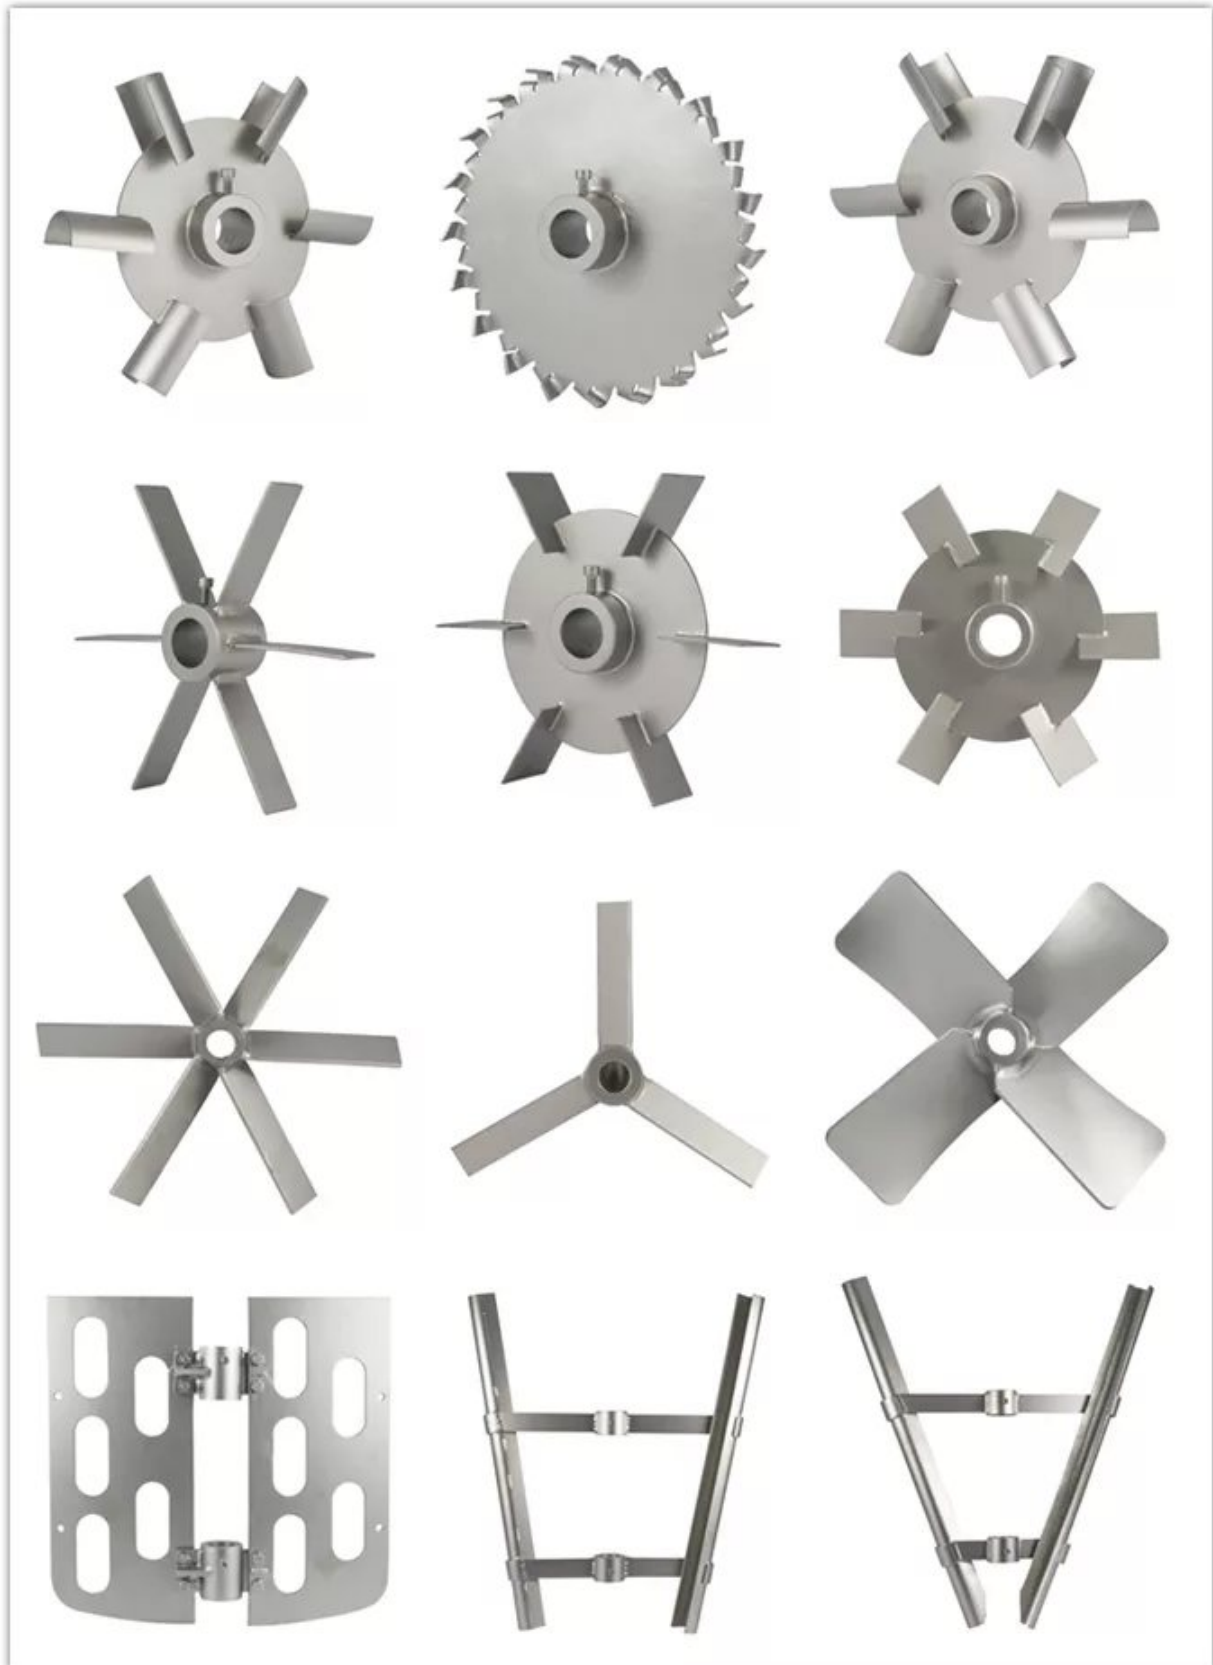

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Stainless Steel Waste Paper Pulp Agitators

Business Background:

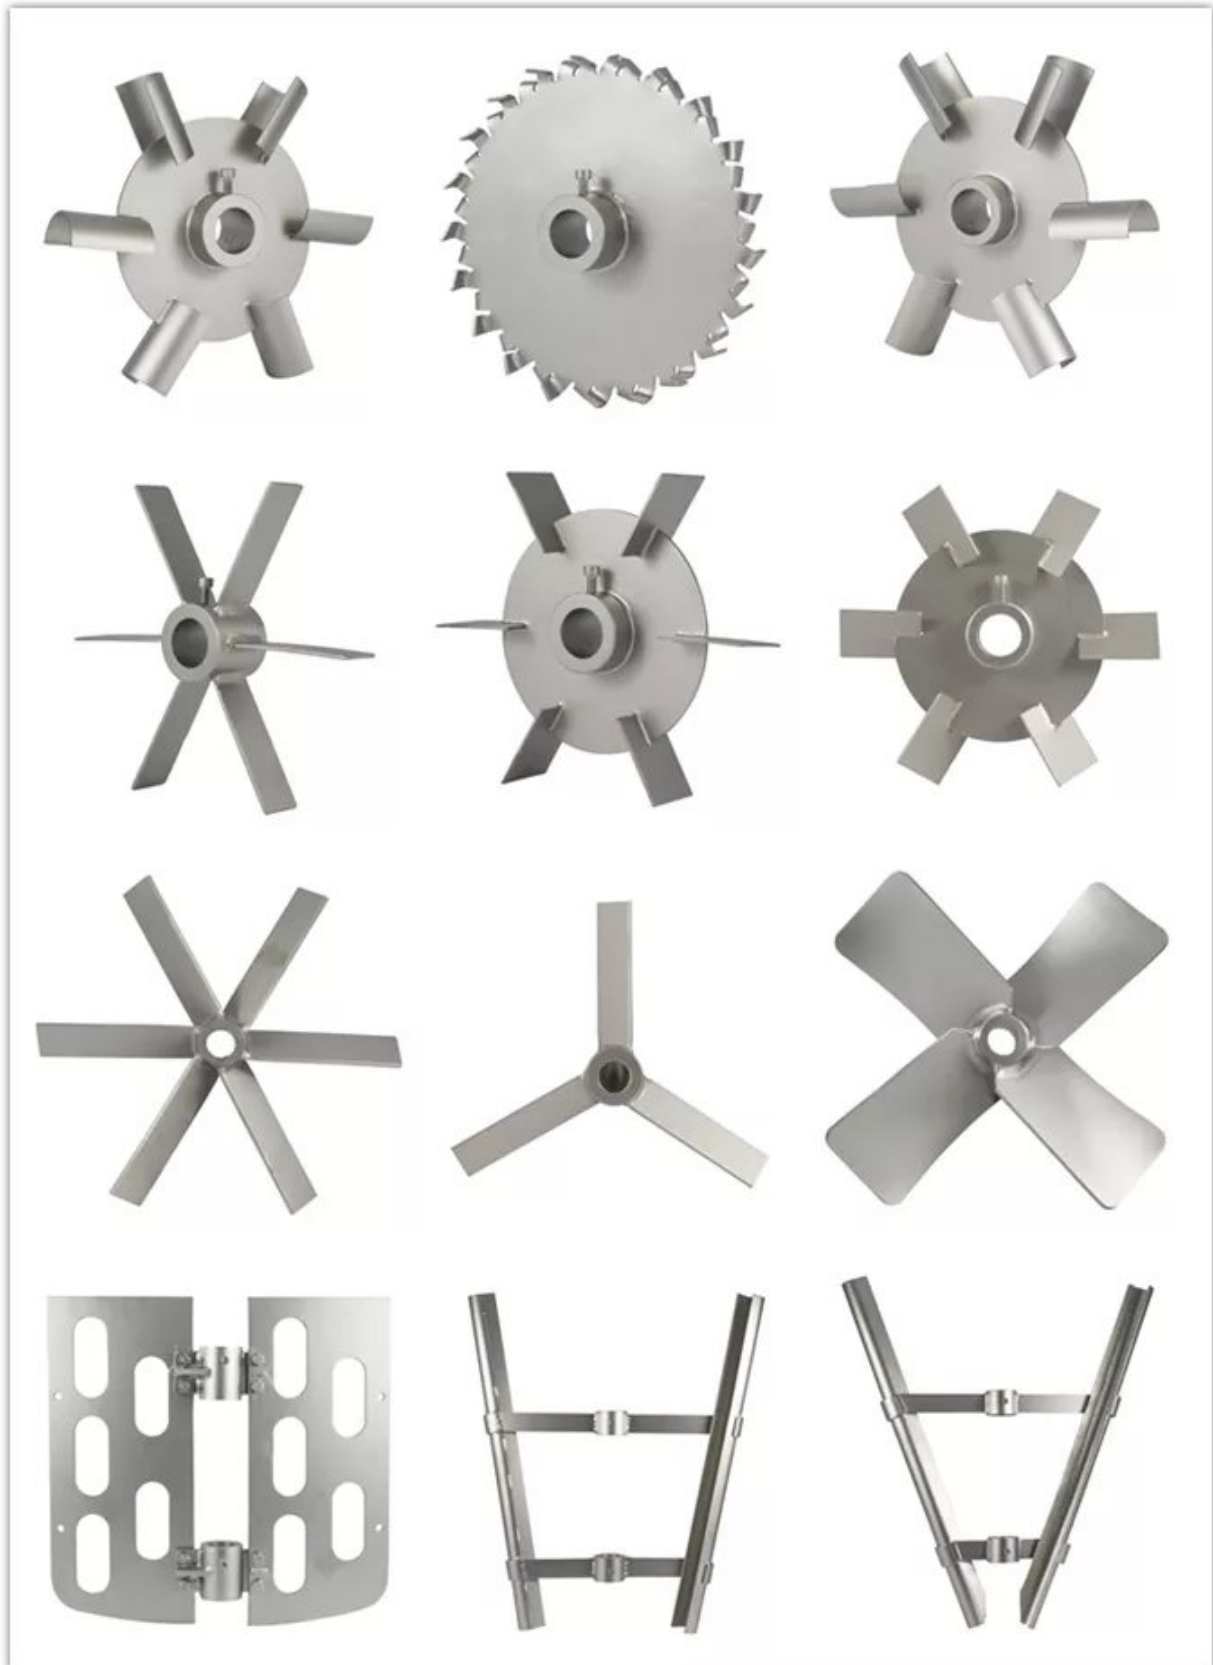

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Stainless Steel Small Size Water Treatment Agitators

Business Background:

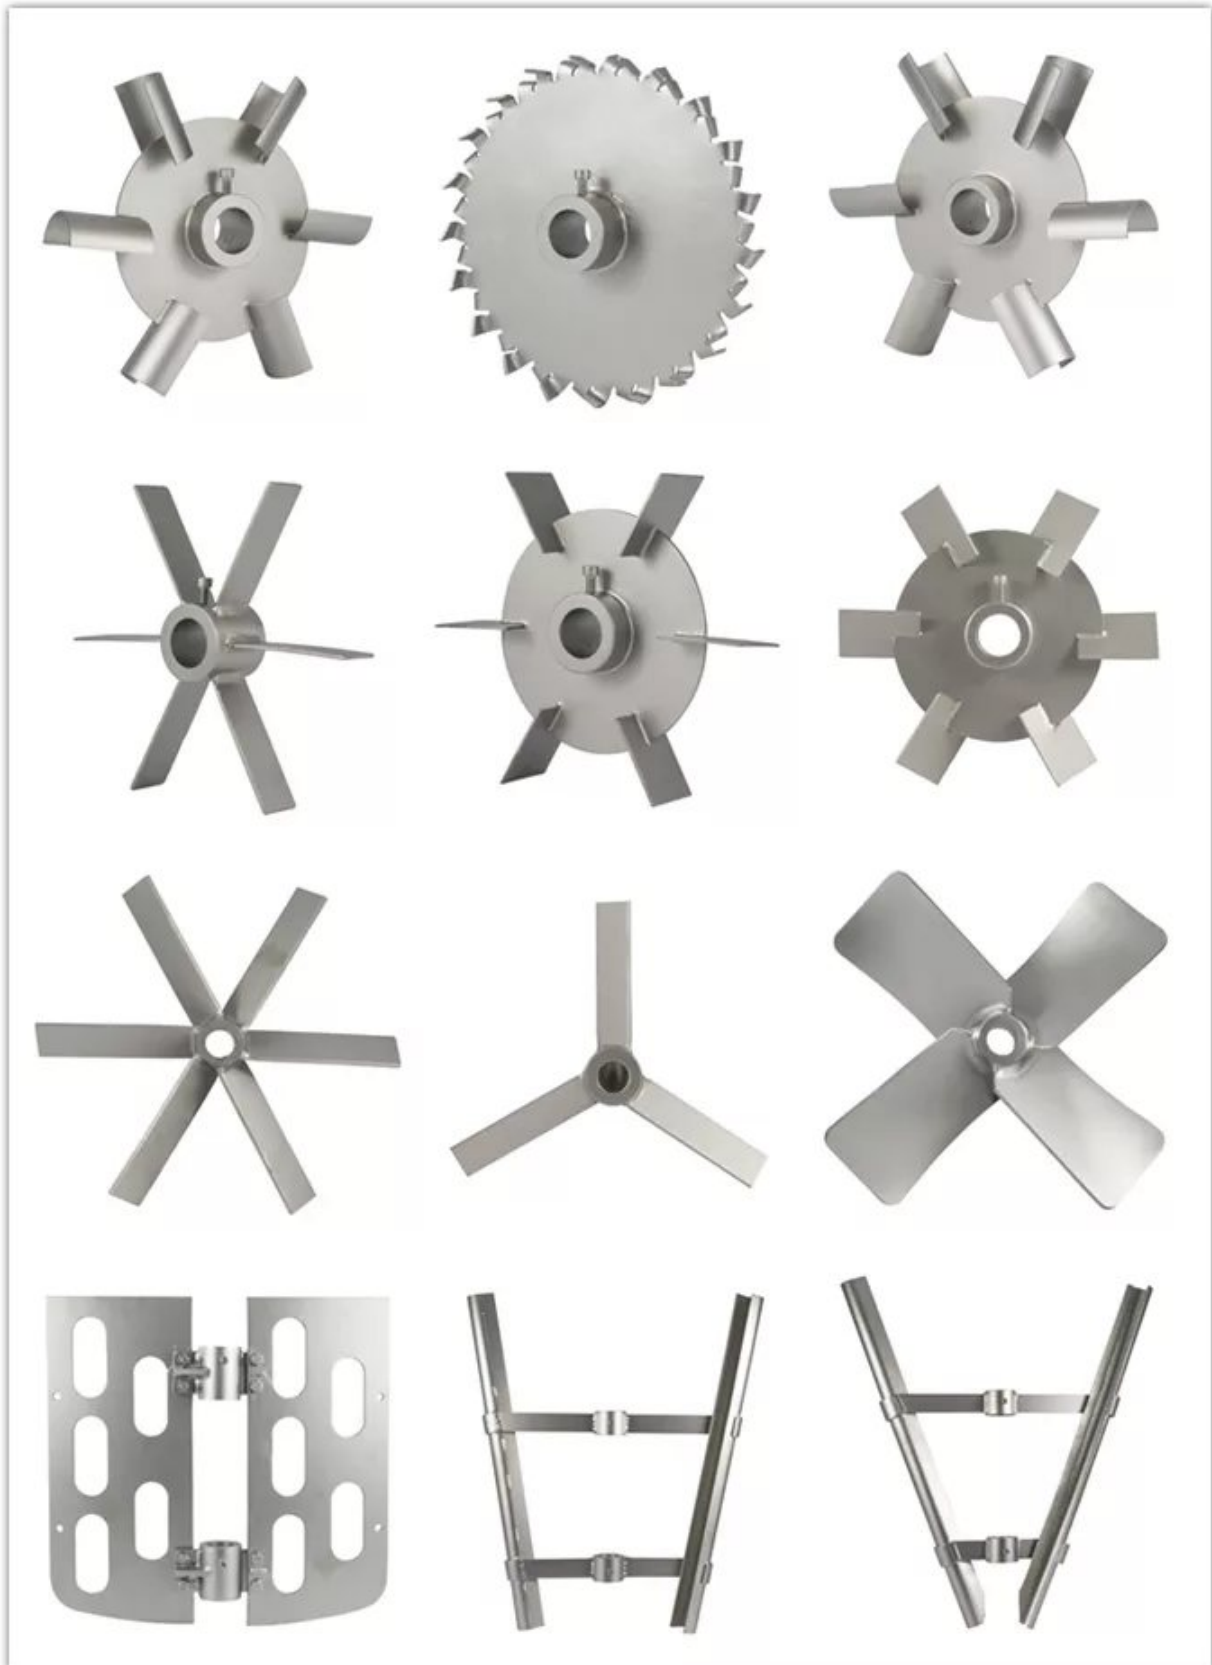

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Shampoo Soap Pressure Heating Agitators Mixing Tanks Agitators

Business Background:

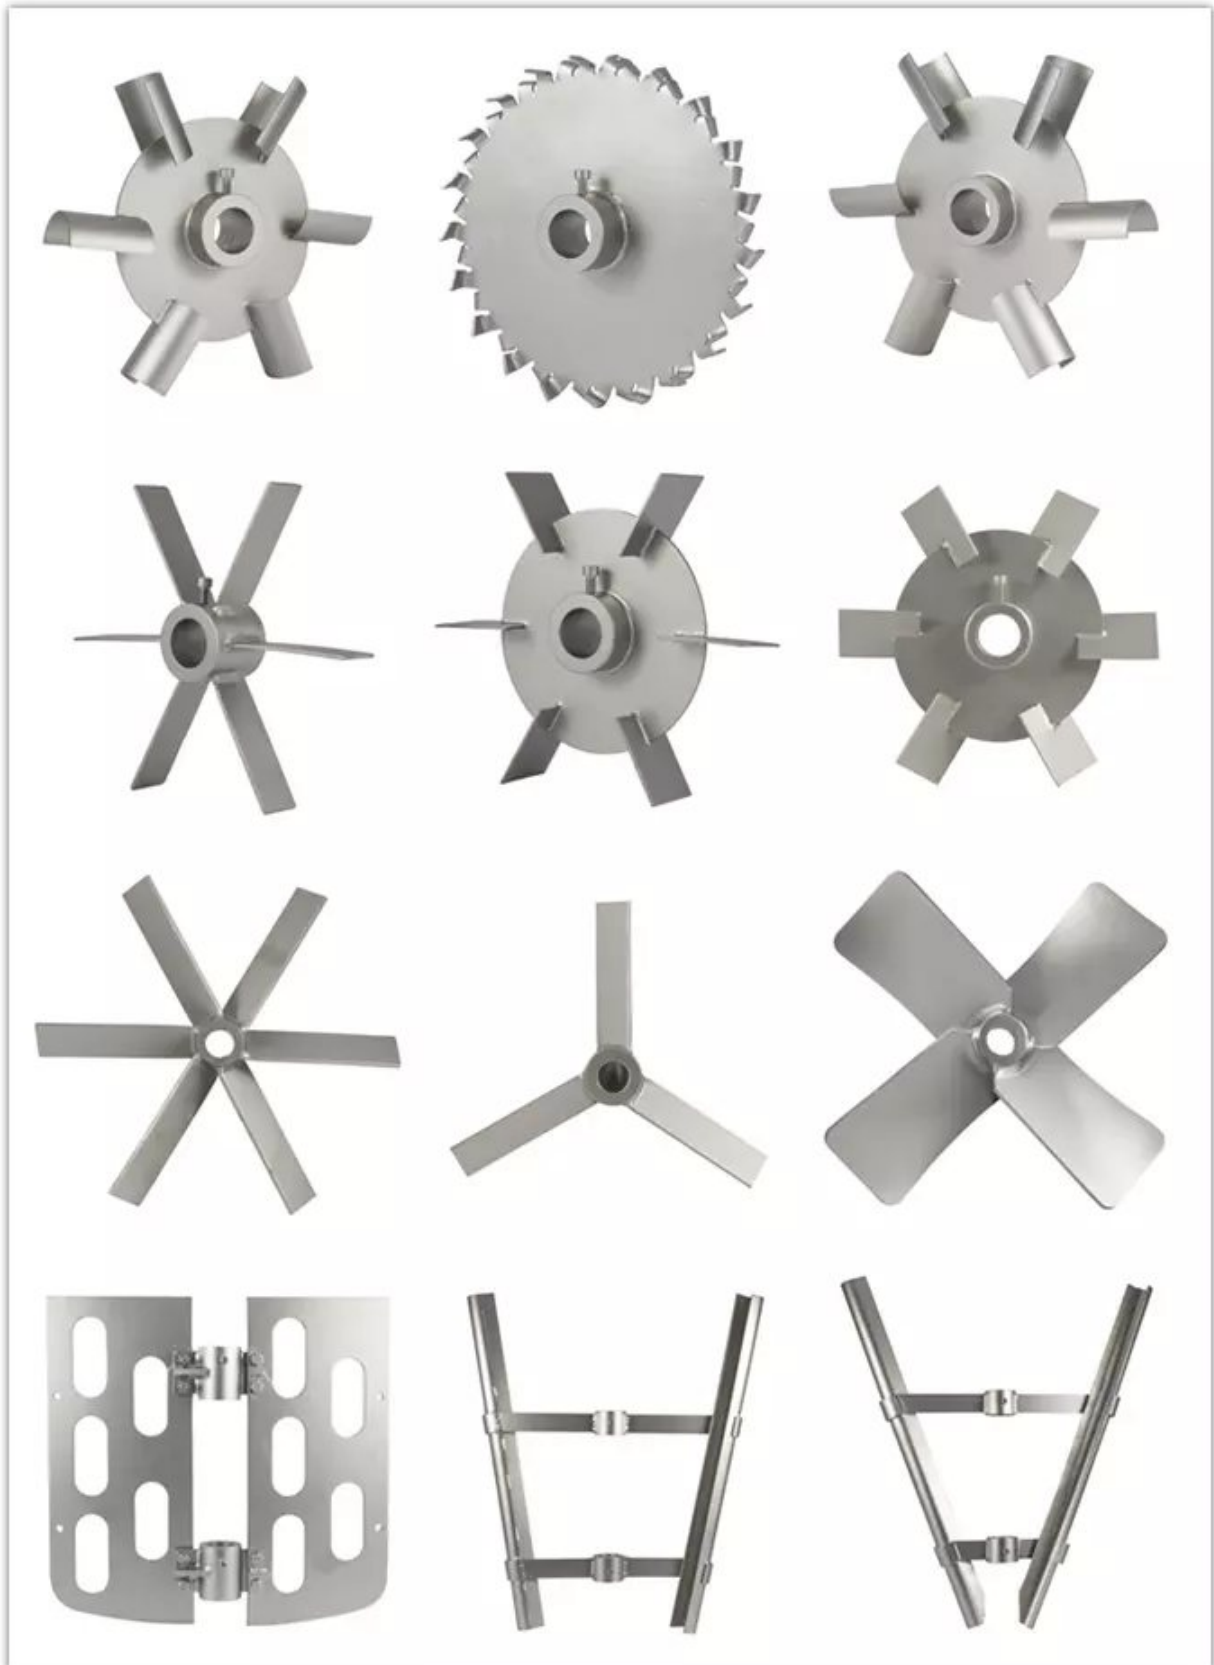

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Industrial Motor Mixing Tank Liquid Mixer Mixing Soap Agitator

Business Background:

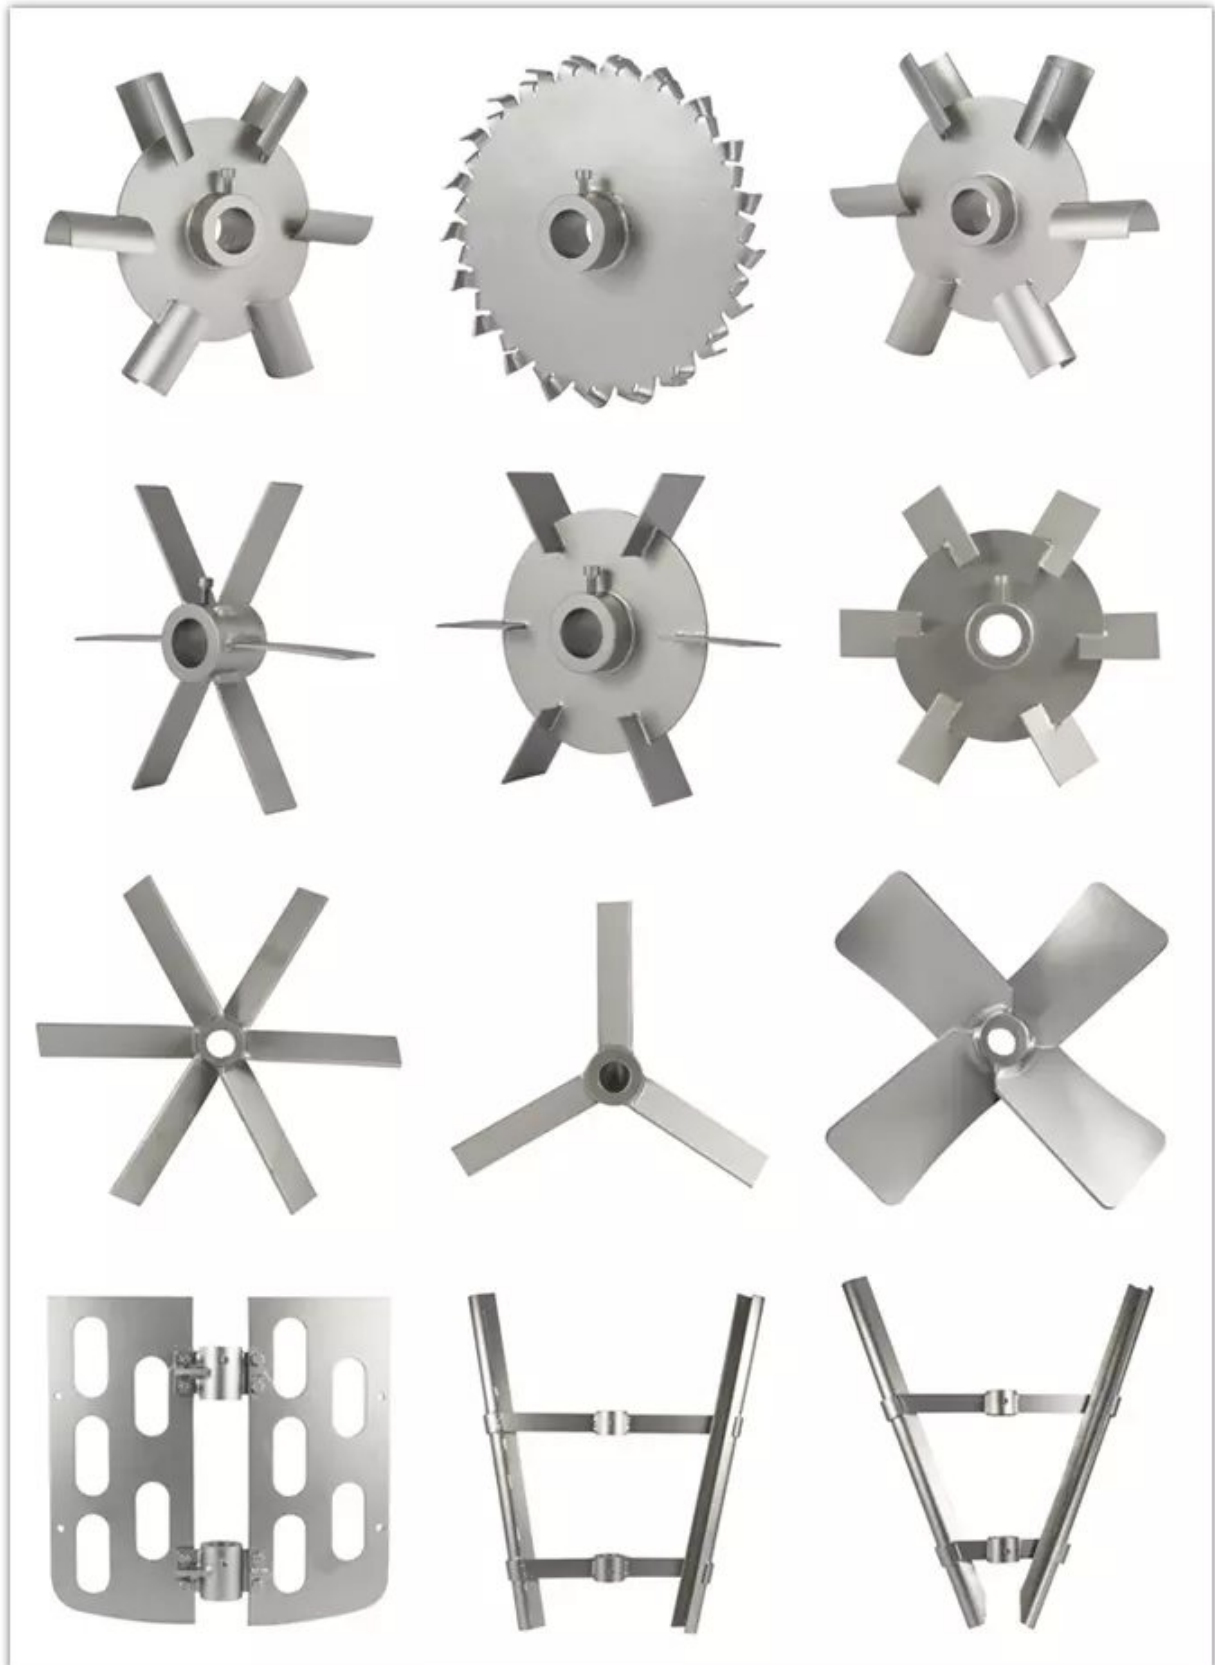

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Small Lab Mixer Flour and Water Vertical Industrial Mixer Agitators

Business Background:

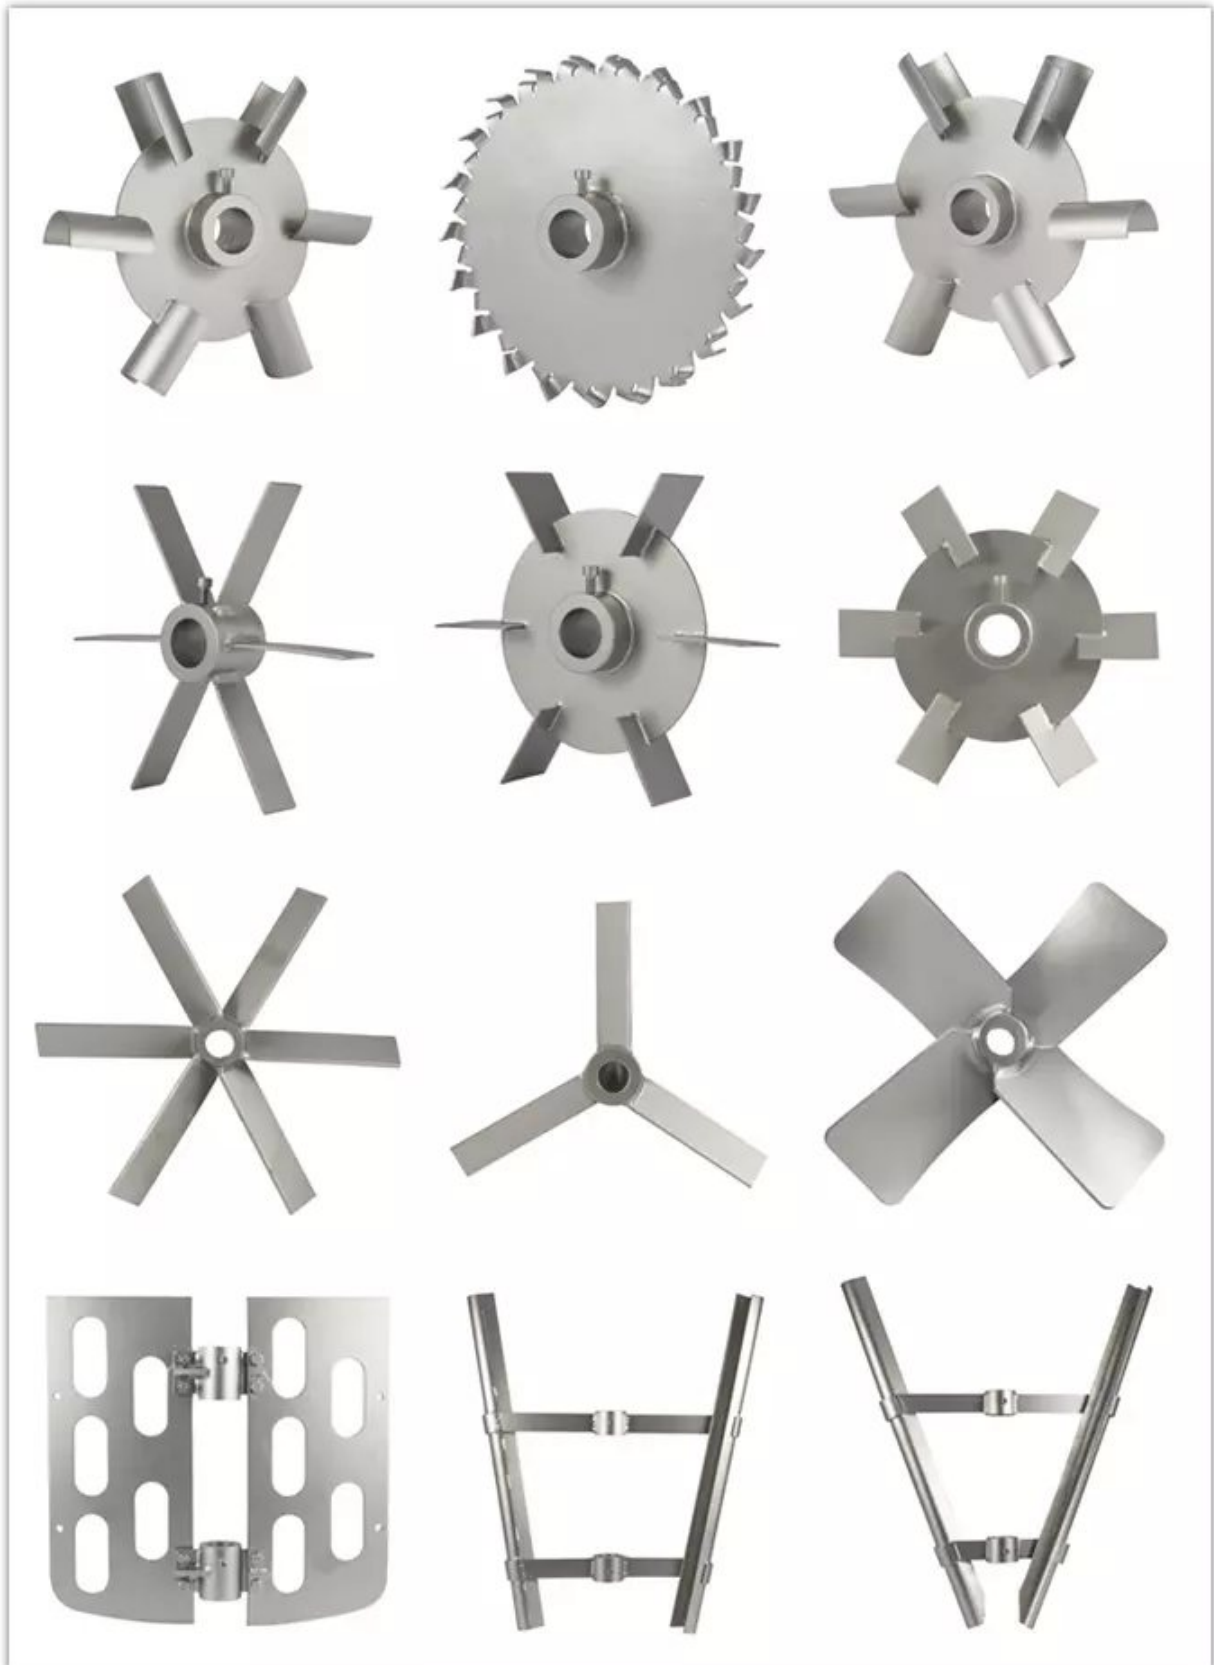

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Stainless Steel Industrial Mixing Agitators

Business Background:

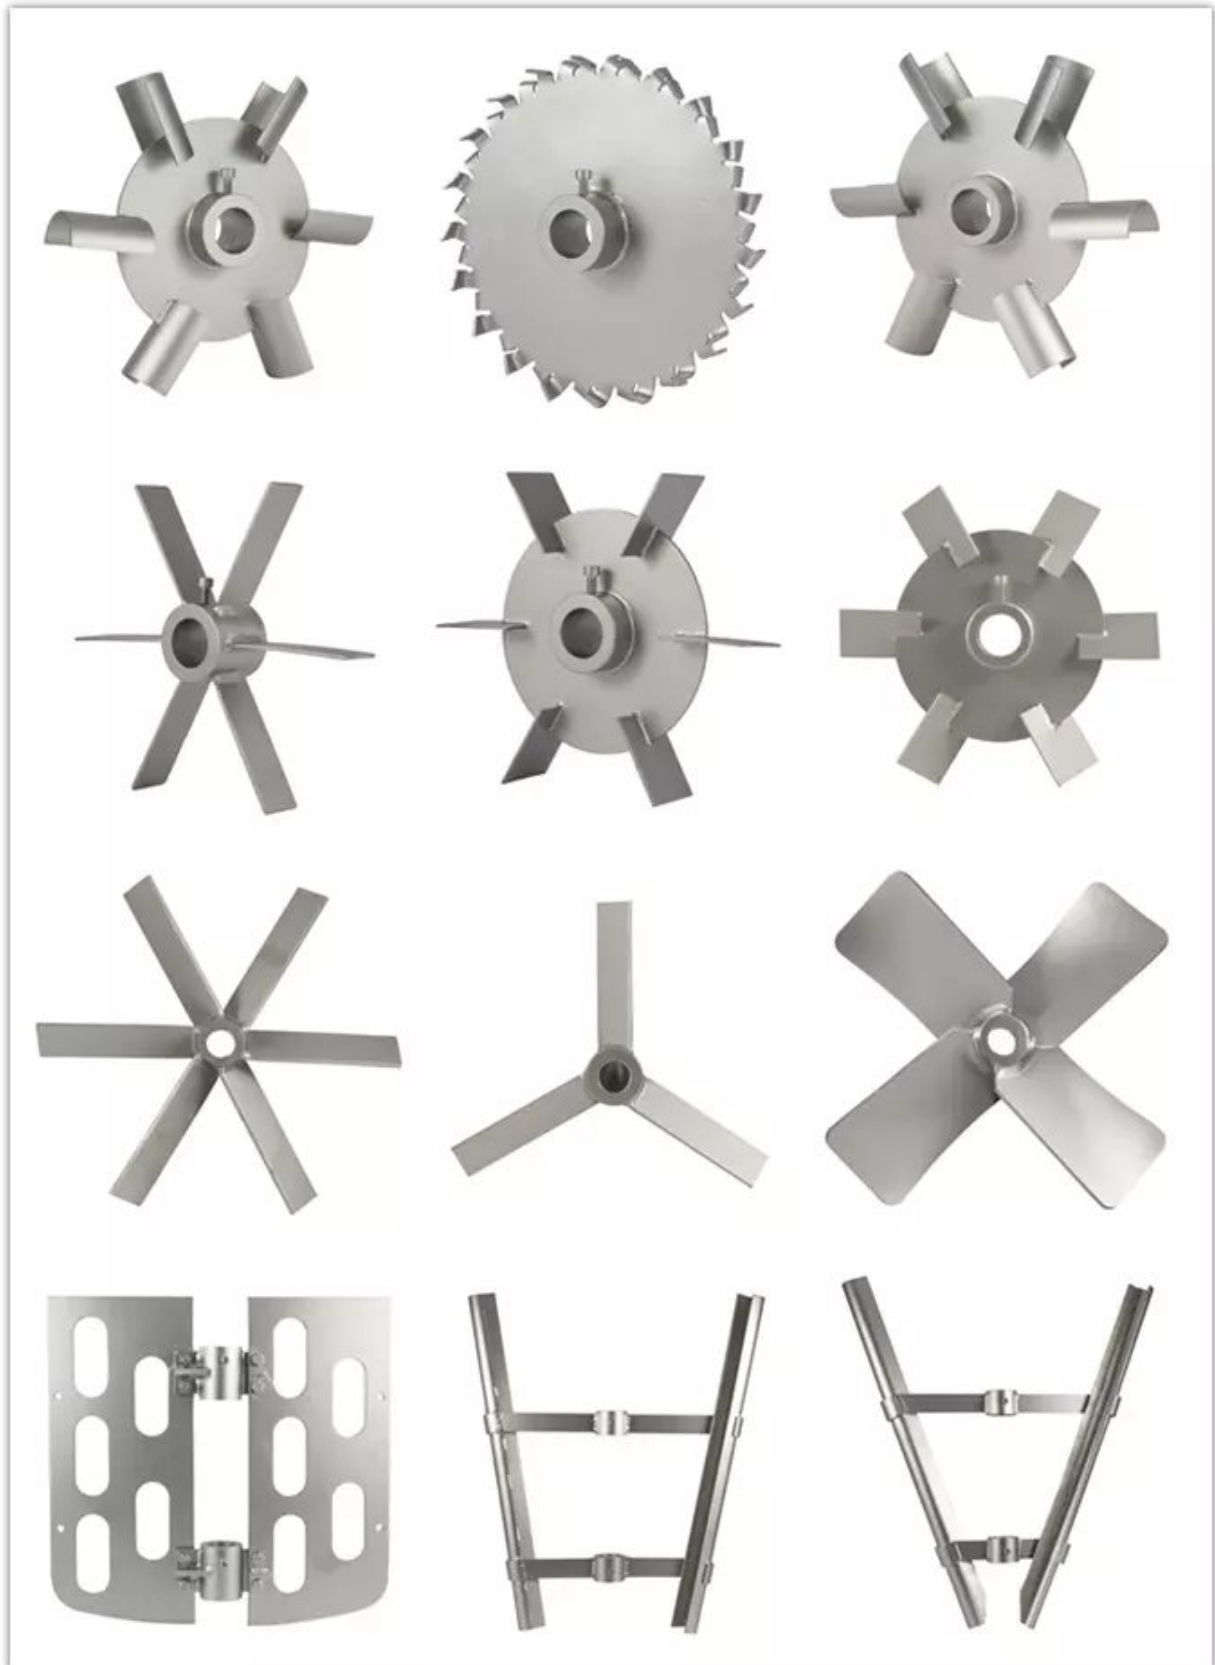

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Impellers Option:

Industrial Top Entry Agitators

From simple storage tanks to complex fermentation tanks and polymerization tanks, Tengyu Mixing has tens of thousands of successful application cases.

Product Description

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.

Typical Uses

The wearing part of ZCX & KCX is stainless steel. This product is widely apply to:

Chemical Industry	Wastewater Treatment	Pharmaceutical Industry
Biological Industry	Environment	Hydrometallurgy
Food Industry	Cosmetic	Energy Industry

Stainless Steel Waste Water Treatment Industrial Mixer Agitators Magnetic Agitators

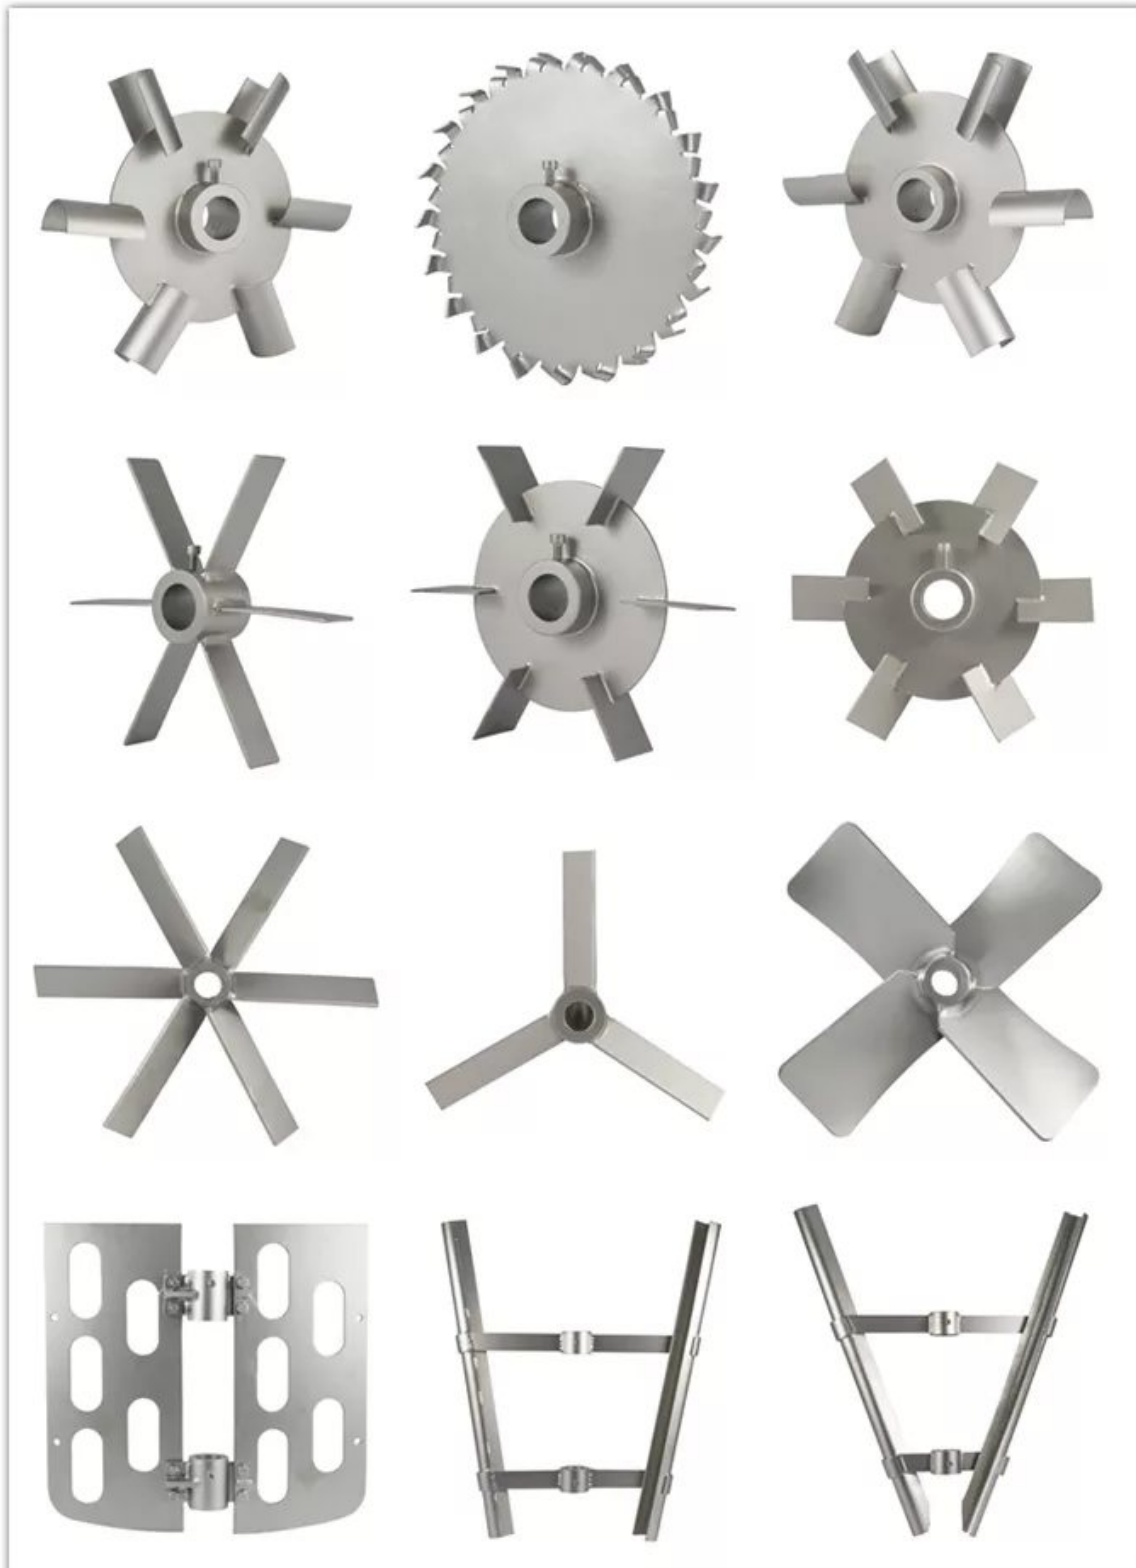

Business Background:

TENGYU has stood for the highest level of development and manufacturing expertise in the field of agitator technology for more than 30 years. We always put the client benefits and reliability of agitator as the first priority. No matter the project size and complexity, you can always find the optimum agitation system for any mixing task: Whether it be for dispresing, suspending, gassing, homogenization or the required heat supply or heat removal. At TENGYU, we offer the right agitator system for every challenge.

Product Description:

The high efficiency axial flow agitator is able to easily solve the problem of homogenous suspension of solidliquid mixture. Also prevent the formation of crystals from being destroyed in crystallization agitation.
